11 Most Poisonous Plants in the WorldPoisonous plants of the UK- Part 1 Toxic Plants
Poisonous plants are plants that produce toxins that deter herbivores from consuming them. Plants cannot move to escape their predators, so they must have other means of protecting themselves from herbivorous animals. Some plants have physical defenses such as thorns, spines and prickles, but by far the most common type of protection is chemical.

List of poisonous plants - Wikipedia
Water hemlock is one of the most toxic plants in nature. Infamously, Socrates' sentence to death was executed by him ingesting hemlock. It's not a decorative plant you will sow in your garden, but it's a widespread weed. It can easily be confused with a blooming carrot, as it looks and smells harmless enough.
