Using a thematic approach, this concise survey explores the many and varied threads of American history-social, intellectual, cultural, political, diplomatic, economic, and military-from the arrival of the first native American inhabitants thousand of years ago through the crisis following the terrorist attacks on New York and Washington on September 11, 2001. Irwin Unger, a Pulitzer Prize winning author, wrote this book after discovering from his own experiences teaching American History at the University of California at Davis and at NYU, that a thematic approach was much more interesting to students than a purely descriptive one.

Each chapter in CONTENTING VOICES examines the lives of two individuals, some of them familiar historical figures and some of them lesser known, who took opposing positions on important issues in American history. The "paired biographies" in the text are followed by a set of four to six related primary sources, many in the individuals' own voices; a "Questions to Consider" section; and an annotated bibliography. This unique format promotes critical thinking and engages students in enlightening historical debates. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Climate change poses many challenges that affect society and the natural world. With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.

Designed to encourage critical thinking about history, the MAJOR PROBLEMS IN AMERICAN HISTORY series introduces students to both primary sources and analytical essays on important topics in U.S. history. This collection serves as the primary anthology for the introductory survey course, covering the subject's entire chronological span. Comprehensive topical coverage includes politics, economics, labor, gender, culture, and social trends. The fourth edition has been revised to reflect two new historiographical trends: the emergence of the history of religion as an exceptionally lively field and the internationalization of American history. Several chapters include images, songs, and poems to give students a better "feel" for the time period and events under discussion. Key pedagogical elements of the Major Problems format have been retained: 15 to 16 chapters per volume, chapter introductions, headnotes, and suggested readings. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Defrauding America, Vol. One, describes in great detail covert operations involving CIA personnel during the past 50 years. It is based on input from dozens of former CIA assets. The book is written by former federal agent Rodney Stich, who has authored over a dozen books on government intrigue. Stich has appeared as guest on over 3,000 radio and TV shows since 1978.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).
