Approximation and
Rounding. Probability is
the science of how
likely events are to
happen. At its simplest,
it's concerned with the
roll of a dice, or the fall
of the cards in a game.
But probability is also
vital to science and life
more generally.

The most basic way to explain probability is using division, where the number of desirable

outcomes is divided by the number of all possible

outcomes—number of desirable outcomes over the number of all

possible outcomes. For example: I have a little paper cup here and it has different colored
