Crisis Intervention takes into account various environments and populations across the lifespan to provide students with practical guidelines for managing crises. Drawing on over 25 years of relevant experience, authors Alan A. Cavaiola and Joseph E. Colford cover several different types of crises frequently encountered by professionals in medical, school, work, and community settings. Models for effectively managing these crises are presented along with the authors' own step-by-step approach, the Listen/Assess/Plan/Commit (LAPC) model, giving students the freedom to select a model that best fits their personal style or a given crisis. Future mental health professionals will gain the knowledge, skills, and confidence to help their clients manage the crises they will encounter in their day-to-day lives.
