Examines the concept
of aging process
facilities and
infrastructure in high
hazard industries and
highlights options for
dealing with the
problem while

Read PDF Api Recommended

addressing safety issues. This book explores the many ways in which process facilities, equipment, and infrastructure might deteriorate upon continuous exposure to operating and climatic conditions. It covers the functional and physical failure modes for various

Read PDF Api Recommended

categories of
equipment and
discusses the many
warning signs of
deterioration. Dealing
with Aging Process
Facilities and
Infrastructure also
explains how to deal
with equipment that
may not be safe to
operate. The book
describes a risk-based
strategy in which

Read PDF Api Recommended

plant leaders and supervisors can make more informed decisions on aging situations and then communicate them to upper management effectively.

Additionally, it discusses the dismantling and safe removal of facilities that are approaching their intended

Read PDF Api Recommended

lifecycle or have
passed it altogether.
Filled with numerous
case studies featuring
photographs to
illustrate the positive
and negative
experiences of others
who have dealt with
aging facilities,
Dealing with Aging
Process Facilities and
Infrastructure covers
the causes of

Read PDF Api Recommended

equipment failures due to aging and their consequences; plant management commitment and responsibility; inspection and maintenance practices for managing life cycle; specific aging asset integrity management practices; and more. Describes symptoms

Read PDF Api Recommended

and causal 579

mechanisms of aging
in various categories
of process equipment

Presents key
considerations for
making informed risk-
based decisions
regarding the repair
or replacement of
aging process
facilities and
infrastructure

Discusses practices
