All disciplines of science and engineering use numerical methods for complex problem analysis, due to the highly mathematical nature of the field. Analytical methods alone are unable to solve many complex problems engineering students and professionals confront. Introduction to MATLAB® Programming for Engineers and Scientists examines the basic elements of code writing, and describes MATLAB® methods for solving common engineering problems and applications across the range of engineering disciplines. The text uses a class-tested learning approach and accessible two-color page design to guide students from basic programming to the skills needed for future coursework and engineering practice.

The first ever successful computer with a GUI, ability to allow users to preview a document before printing, and a mouse was the Mac. The following are the reasons why it has remained relevant all these years. Turned Icons into Art Since Mac was the first computer with a GUI, it was the first to have icons. Susan Kare designed those first icons for Mac. Macs Beg to Be Networked Back when the Mac was launched, computer networking was exotic and pricey; but even then, Macs could be easily connected to each other. HyperCard Partly Inspired the Web The HyperCard was created by Bill Atkinson in 1987. Through this app, anyone could create on-screen cards with hyperlinks, images, or texts. The Mac laptop is advanced right out of the box, it comes with many basic tools such as calendar management, email, etc. However, there is another world of powerful software for Apple Mac that will make complicated tasks easier. Although most of them are not free, they only cost a few bucks and they are well worth it. Here are some of the best.

The MacBook Pro carrying the Apple M1 micro device is competent in helping you use applications with increased speed. The device has also improved its technology to adopt Wi-Fi 6 and accept USB 4. The keyboard facility has been improved in the aspects of Fn/Globe Key and Touch ID. With the macOS Big Sur, the Mac computer has an amazing different outlook. It is built in a way that makes it identical to other Apple products. With this recent look, there is the menu bar and the translucent dock. Former icons are retained but have been upgraded and the gaps between the menus have been increased. Running applications are better with the longer side bars and newer icons on the toolbar. The additional notification ringtones are interesting features in the device. With the updates on the device, scrolling is better and the following fixtures improve how you use your MacBook Air.
