Adaptation to climate change: In terms of adaptation measures, there are several actions that help reducing vulnerability to the consequences of climate change: More secure facility locations and infrastructures. Landscape restoration (natural landscape) and reforestation. Flexible and diverse cultivation to be prepared for natural catastrophes.

Mitigation and adaptation to climate change

How to stop climate change. It's easy to feel overwhelmed, that climate change is too big to solve. But we already have the answers, it's just a question of making them happen. Fossil fuels need to be quickly replaced with cleaner, renewable energy like wind and solar power. Governments and companies need to further invest in low carbon transport solutions.

Climate change | Greenpeace UK

Addressing climate change is one of the core land use planning principles which the National Planning Policy Framework expects to underpin both plan-making and decision-taking.

Climate change - GOV.UK

Being prepared for the impacts of climate change. Website accessibility help. The cumulative concentration of excessive greenhouse gasses in the atmosphere from human activity has already committed us to experience a significant degree of climate change. In Cambridge the most immediate of these is likely to be felt through building overheating from summer heat-waves.
