Boeing 767 Systems Guide
The 767 was the first Boeing wide-body to be designed with a two-crew digital glass cockpit. Cathode ray tube (CRT) color displays and new electronics replaced the role of the flight engineer by enabling the pilot and co-pilot to monitor aircraft systems directly. Despite the promise of reduced crew costs, United Airlines initially demanded a conventional three-person cockpit, citing concerns ...

FAA warns about Boeing 747 & 767 fuel tank ignition risk. The Federal
Aviation Administration released two new airworthiness directives (AD)
which require the airlines of the United States to modify their Boeing
747s and Boeing 767s fuel tank monitoring systems in order to prevent
the risk of ignition within the tanks. The new directives apply for
Boeing 747-400, 767-200, 767-300, 767-300F models as well as 767-400ER
series jets, the FAA announced on October 6, 2020.

FAA warns about Boeing 747 & 767 fuel tank ignition risk
767-200 and 767-300 models, the model designator will show 757-300 –
767-300. If information is applicable to models that are not
consecutively numbered, a comma (,) is used in the model designator.
For example, if information is applicable to only 757-200 and 767-400
models, the model designator will show 757-200, 767-400. Model 757-200
757-300
