We use the following formulas: or $v, \times T K oc + 273$ Solve the following problems assuming a constant pressure. 2.

Boyles Law Chemistry If8766 Instructional Fair Inc Key

Boyle's law states that the pressure of an ideal gas increases as its container volume decreases. Chemist and physicist Robert Boyle published the law in 1662. The gas law is sometimes called Mariotte's law or the Boyle-Mariotte law because French physicist Edme Mariotte independently discovered the same law in 1679.

Using Boyle's Law for this case, we have $P_{\text{final}} V_{\text{inter}} = P_{\text{initial}} V_{\text{initial}}$!
 $V_{\text{inter}} V_{\text{initial}} = P_{\text{initial}} P_{\text{final}}$ (15) Because pressures can be measured directly, we want to replace the ratio of volumes in Eq. 14 with a ratio of pressures: $P_{\text{initial}} P_{\text{inter}} = P_{\text{initial}} P_{\text{final}}$!
" # \$ % & ' (16) Now, after taking the natural logarithm of ...
