Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for

the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well – to help students learn how to frame and reframe a question/issue. Business Organizations, Second Edition is a pedagogically rich book that recaptures student engagement in the course without sacrificing basic rigor. The traditional coverage of most books in the field is retained, but modernized in reflecting the importance of unincorporated entities and small business counseling problems. Transaction-oriented problems put the student in the practice role of advising a variety of businesses. An expository approach provides clear context for cases. Features include flowcharts, connections boxes, self-testing exercises, an interspersed series of exercises on ethics for business lawyers, a glossary of terms, and sidebars on numerical concepts and skills. Through the use of side-bar explanations or otherwise, the chapters or major sections of chapters in the book stand alone, facilitating teaching in almost any order. An online supplement includes a “business concepts for lawyers” module to be assigned as an instructor desires, as well as a variety of sample documents to show students the actual materials that lawyers work with every day.
