

## Cadence Spectre Model Library Tutorial Step 1 Edit Cds

Eventually, you will certainly discover a additional experience and endowment by spending more cash. still when? accomplish you admit that you require to get those all needs with having significantly cash? Why don't you attempt to acquire something basic in the beginning? That's something that will guide you to comprehend even more roughly speaking the globe, experience, some places, afterward history, amusement, and a lot more?

It is your agreed own time to action reviewing habit. accompanied by guides you could enjoy now is **cadence spectre model library tutorial step 1 edit cds** below.

You probably need to ensure that all your applications (including spectre) are running in 64-bit mode. With spectre you can add -64 on the command line, choose "64bit" on the Setup->Environment form, or simply use: setenv CDS\_AUTO\_64BIT ALL (if using csh) or: export CDS\_AUTO\_BIT=ALL (if using bash/ksh) before starting Virtuoso.

In the Virtuoso Schematic window go to Tools -> Analog Environment. The design should be set to the right Library, Cell and View. As in Tutorials 1 and 2 we first need to set up the right simulator (spectre), then set the two model library files for the nmos and pmos (please revisit Tutorial 1 for the details). We also need to set up the power supply.
