A Case Study Approach to Educational Leadership takes on six core areas of school leadership—organizational vision; curriculum, instruction, and assessment; school and external community; school climate and culture; equity; and improvement, innovation, and reform. Using a case learning approach, this volume introduces salient theoretical and empirical literature in each core area and provides illustrative cases designed for individual and group analysis. Written for aspiring educational leaders, this book facilitates the discussion and reflection of individual and collective professional judgment and helps developing leaders make sense of the challenges school leaders face today. Discussion Questions foster reflection of content and practical applications Featured Cases direct readers toward the issues of practice embedded within the theoretical content area Leadership Activities and Web-Based Resources support leaders in making further connections to practice Linkage to relevant Professional Standards for Educational Leaders (PSEL) standards ground each chapter in the latest guidelines for the field Special Features.

Includes contributions from some of the most distinctive leaders in the field, this volume outlines agendas for leadership and development, offering readers innovative ideas about what constitutes leadership.

Today, managers, politicians, educators, and healthcare providers are highly skilled technicians who navigate modern systems. However, followers seek more than know-how; they desire moral leadership. Even leaders equipped with skills must make difficult ethical choices. This book connects philosophy to leadership by examining three representative texts from the history of philosophy: Plato's Republic, Aristotle's Nicomachean Ethics, and Niccolò Machiavelli's The Prince. The leadership ideas contained in each one of these philosopher's works were not only pioneering for their age but continue to be relevant today because they provide insight into the enduring questions of leadership. The book demonstrates the timeliness of the classical works by applying these philosophical approaches to historical and contemporary cases. This book is ideal for readers who are acquainted with philosophy and those who are uninitiated. The connections made between philosophy, leadership literature, and real-life leaders enable readers to appreciate how deeper reflection into the themes of leadership might merit scholarly attention and bear witness to the close union between the philosophy of leadership and the real world.

"This book focuses on cases that present scenarios of organizations or individuals who are immersed in environments that are impacted by cultural factors. It involves aspects related to leadership, management, finance, human resources, accounting but all will focus on skills related to global leadership" --

This text provides a unique collection of case studies across a wide range of organizations (higher education, K-12 education, military, state and local government administration, non-profit institutions, and agency management, etc.). These cases examine ethical decision-making and organizational and leadership behavioral concepts that are practiced in these organizations. The cases cover topics facing our workforce today and ask the reader to solve the dilemma. Through a discussion of these cases, students apply decision making and organizational and leadership strategies to analyze each case and therefore gain a better understanding of how to effectively lead and manage within their organizations. This text challenges students to think critically and analytically. Students are encouraged to reflect on options a practitioner could use to solve the problem. All of the cases end with an open scenario and a set of questions, allowing students to offer a wide range of opinions and participate in reflective and robust discussions.
