VBiotic Cell Growth

And Division Section

Interphase. A cell grows and carries out all normal metabolic

functions and processes in a period called G₁

(Figure

$\backslash(\backslash\text{PageIndex}\{1\}\backslash)$). G₁

phase (gap 1 phase) is

the first gap, or growth

Bookmark File

PDF Cell

phase in the cell cycle.

For cells that will divide again, G₁ is followed

by replication of the

DNA, during the S

phase. The S phase

(synthesis phase) is

period during which a

cell replicates its DNA.

types be maintained.

This is achieved by the highly regulated process of cell proliferation.
