In Changing the Face of Engineering, twenty-four eminent scholars address the underrepresentation of African Americans in engineering from a wide variety of disciplinary and professional perspectives while proposing workable classroom solutions and public policy initiatives. They combine robust statistical analyses with personal narratives of African American engineers and STEM instructors who, by taking evidenced-based approaches, have found success in graduating African American engineers.

"For me, changing the face of engineering has three facets: changing the face of our people, changing the face of our graduates and changing the face of our college. Each of these components plays an important part in helping us to achieve a profession that is more representative of the world we serve, which includes equal representation of women and men." Ropella says.
