Clinitron Air Fluidized Bed Manual

Clinitron Air Fluidized Therapy Bed A bed specially designed for people with pressure ulcers, the Clinitron bed utilizes air fluidized therapy, or AFT, to reduce the risk factors of bed sores and promote the healing process. It reduces pressure on the areas of the body prone to bed sores. It dissipates the body heat produced by patients.

Online Library Clinitron Air Fluidized Bed Manual

An air -fluidized bed uses warm air under pressure to set small ceramic beads in motion which simulate the movement of fluid. When the patient is placed in the bed, his body weight is evenly distributed over a large surface area which creates a sensation of "floating" (CMS, 2000). POSITION STATEMENT Applicable To: Medicaid □ All Markets

Clinitron Rite Hite Air Fluidization Bed Manual

Clinitron ® Air Fluidized Therapy At a glance □ AFT accelerates wound healing, reducing the cost of care □ Relieves pressure on wound sites, allowing for increased capillary blood flow □ Maintains a cleaner, more comfortable micro-environment to inhibit bacterial growth □ Minimizes shear, friction, and maceration to promote healing

Hill-Rom Clinitron Air Fluidized Therapy

Clinitron ® Air Fluidized Therapy beds provide an ideal healing environment for compromised skin by minimizing the forces that cause tissue breakdown: pressure, shear, friction, heat and moisture. Clinitron Rite Hite system's unique air fluidized therapy minimizes interface pressure, while maximizing the surface's immersion and envelopment properties to support healing.

Air Fluidized Bed □ Clinitron® Rite Hite® | Hillrom®

Air Fluidized Therapy is proven to be one of the best technologies to help wounds heal faster. With AFT, the bed is filled with silicone beads and warm filtered air, providing a fluid-like flotation that gently flows around the patient. AFT relieves pressure on wound sites, allowing for increased capillary blood flow.

Clinitron beds for in-home wound healing and recovery

Accelerating wound healing. Elevating the standard of care. Patients with complex wounds need elevated care. So, we designed the Envella ® Air Fluidized Therapy (AFT) Bed as our most advanced wound care surface to date. The Envella ® bed can help your patients heal more quickly and comfortably. It pushes air through millions of tiny beads, creating a fluid-like environment that feels similar ...

Envella Air Fluidized Therapy Bed | Hillrom

No. In our protocol, when using an air-fluidized bed (the generic term for beds such as the brand Clinitron), the person had to be totally flat in bed with only 1 head pillow for at least the first 2 weeks post surgery, and then, only if the flap looked very good, they would be allowed to use the 20 degree back wedge pillow that is available for use with such beds.
