transfer for a relatively short time and/or in a relatively thick material

□ The governing equation with no bulk flow and no heat generation is

□ The boundary conditions are □ The initial condition is  $T(x, 0) = T_i$

Conduction Heat transfer: Unsteady state

# Read PDF Conduction

Heat transfer occurs at a lower rate in materials of low thermal conductivity than in materials of high thermal conductivity. For instance, metals typically have high thermal conductivity and are very efficient at conducting heat, while the opposite is true for insulating materials like Styrofoam .
