(PDF) Cosmeceuticals and Cosmetic Ingredients

Cosmetic ingredients previously considered "inert" have potential to provide a biologic effect to skin. In a cosmeceutical formulation, the boundary between an "active" and "inert" ingredient may be obscured. For this reason, the cosmeceutical distributor must find a nonambiguous method to demonstrate the efficacy of a new ingredient.

Cosmeceuticals, however, are changing the game: they bring clinically therapeutic ingredients with biologically available and targeted action into the mix. In top cosmeceutical brands like Medik8, you'll get intense concentrations of active products, natural sources, and actual results. How are cosmeceuticals better than cosmetics, then?

Difference Between Cosmetics and Cosmeceuticals | Skin ...

Cosmeceutical is a word that combines [cosmetic] and [pharmaceutical]. This type of product has the active potential to bring about visible changes to the skin, backed by clinical evidence. Applied topically, a cosmeceutical product can penetrate deeper into the skin where vital collagen, elastin and cellular activity takes place.

This text defines what constitutes cosmeceuticals and discusses various classes of products, from anti-ageing skin care and repair, anti-acne, and hair-growth compounds to agents for treating skin infections, rashes and irritations.

Anti-aging skin care is an important part of dermatologic practice. The science behind the aging process has led to revolutionary changes in the treatment options available. Dermatologists can offer increasing numbers of combinations of pharmaceutical and cosmetic products. As choice increases so the possibility of confusion arises. Cosmeceuticals and Cosmetic Practice offers a no-nonsense guide to defusing this confusion. With an emphasis on practical applications, and with easy-access summary features, you can learn the secrets of successful cosmeceutical practice for your patients.

Reports on the origin, function, and possible effects of specific preservatives, acids, buffers, humectants, colorings, flavorings, and processing agents found in cosmetics.

Containing more than six thousand updated entries, a helpful resource of information on the ingredients in cosmetics reports on the origins, function, and possible health effects of specific preservatives, acids, buffers, humectants, colorings, flavorings, and processing agents. Original. 15,000 first printing.

"The purpose of this book is to show how cosmeceuticals (defined as a skin care product with bioactive ingredients, which have a desired effect on the skin) work for a variety of skin care concerns, and in concert with cosmetic procedures commonly used by dermatologists and cosmetic physicians"--

Interest in the molecular and mechanistic aspects of cosmetic research has grown exponentially during the past decade. Herbal Principles in Cosmetics: Properties and Mechanisms of Action critically examines the botanical, ethnopharmacological, phytochemical, and molecular aspects of botanical active ingredients used in cosmetics. Along with dermato
