SAP Fiori Launchpad – Deployment Options and Recommendations

Intelligent systems can help users by recommending appropriate content or suggesting an action or input the user may " prefer " . In this case, we speak of a recommendation pattern and its impact on UI. In SAP Fiori, we differentiate between three types of recommendations: content recommendations, input assistance, and solution proposals.

Recommendations | SAP Fiori Design Guidelines

Deployment of SAP Gateway For running SAP Fiori apps, we recommend that you use a Central Hub Deployment of SAP Gateway. This means that you install SAP Gateway independent of consumer technologies in a standalone system, either behind or in front of the firewall.
