Abstract. The papers presented at this conference examine DNA profiling and how it impinges on the criminal justice system. Scientists, lawyers and police explain how this new expert evidence affects their areas of work. Developments such as Polymerase Chain Reaction (PCR) are presented, and the problems of quality control are revealed in detail. These matters are of great importance when treating evidence in court.

DNA and eriminal justice | Australian Institute of Criminology

The source of the police power to take DNA samples from individuals in custody originates in section 63A of the Police and Criminal Evidence Act 1984. However, until the Criminal Justice and Police Act 2001, it was unlawful for the police to retain those samples where an individual was subsequently acquitted or the charges discontinued.

DNA retention by police — JUSTICE

DNA is nothing without thorough crime scene analysis. For DNA to be useful, proper crime scene management is essential. In the US, the case in which Amanda Knox was convicted (and ultimately cleared) of murdering her British roommate was found to have several issues with how evidence was handled.

How DNA analysis has revolutionised criminal justice | this

The advent of DNA (deoxyribonucleic acid) evidence is one of the best examples of how much technology has altered the criminal justice landscape, particularly its use to exonerate the falsely convicted.DNA evidence technically doesn't pinpoint a single suspect, but rather narrows it down to just a few possibilities within the human population.
