The post-World War II generation, the Baby Boomers, are beginning to retire at a time when U.S. life expectancy has never been higher. As a result, the population of senior drivers is exploding, a phenomenon that will create potentially massive problems for our traffic planners, highway safety engineers, and healthcare providers, as more and more Americans in their 70s, 80s, and even 90s continue to ply the roadways. Safe Senior Drivers is a unique, invaluable tool for keeping yourself—and your aging parent—as safe as possible on the roads. Packed with useful information and references, this guide is the clearest, most comprehensive resource available on what indeed is a critical time in the life of everyone who intends to stay behind the wheel and function well in today's driving environment.

Research on driver behaviour has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The objective of the book, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. The book is timely in its aim of defining new approaches to driver training methodology based on decades of empirical research on driver behaviour. The contributing road safety researchers and professionals consider the kinds of methods that are effective in teaching drivers the higher-level skills needed to be a safe competent driver. The readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field from regulatory authorities and professional driver training organisations such as the police service, and private and public sector personnel who are concerned with improving road safety.

The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society offers an explanation for the continued debate about one road safety intervention - the speed camera - by situating that debate within contemporary literature about the 'risk society' (Beck, 1992) and more broadly understood experiences of risk faced on a daily basis by drivers. Rather than a focus on risk as something that can be objectively assessed, measured and managed separately from the social context in which it is encountered, it suggests that 'risk' is something that permeates this particular debate from every angle.

A Star Shines For Love This book was written in memory of my sister Diane who died in a tragedy at the request of my Father. This book was writtein to provide hope and inspiration to many people of our culture : this is an age where a lot of people ask the same question hidden deep within the Heart: How can I pray when I am hurting? Who will Heal My Broken Heart? Who is the Saint of the Broken Hearted? For whom does the star still shine? Some of us can verbalize our questions, others walk with much pain afraid to even ask the question, in fear of ridicule from themselves or others. Others, turn to other unhealthy avenues to relieve their pain . This book provides an avenue to Hope ...It is a long road and some of us are just beginning to get on the highway, and others are leading the way. Will you become a leader or will you follow. Who will you follow? Angels of Love
