A+DMuseum. A+D. Museum. Eero Saarinen. curated by Mina Marefat. 10.05.12-02.28.13. Wilshire Boulevard Location. Born in Finland, Eero Saarinen (1910 – 1961) is recognized today as one of America ' s most influential architects of the 20th Century. The exhibition at A+D Architecture and Design Museum in Los Angeles highlighted his short but brilliant career bookended with two iconic buildings: the unbuilt Smithsonian Gallery of Art, which was to be Washington, DC ' s first museum of modern ...

Eero Saarinen — A+D Architecture and Design Museum

Eero Saarinen 1910-1961 The Tulip Table & Tulip Chair - A Design History The Tulip Table and Chair were designed in the mid 1950's by Eero Saarinen, for the furniture house Knoll International and were initially called the 'pedestal group' owing to their remarkable base which grew 'like the flower' from the centre as opposed to having the more traditional standing legs.

History – The Little Tulip Shop

Eero Saarinen (1910-1961) was one of the 20th century's great visionaries, both in the fields of furniture design (he created the ubiquitous Knoll "Tulip" chairs and tables, for example) and in architecture.

Eero Saarinen: 1910-1961: A Structural Expressionist by ...

1910-1961 Born to world famous parents, architect and Cranbrook Academy of Art director Eliel Saarinen and textile artist Loja Saarinen, Eero Saarinen was surrounded by design his whole life. It came as no surprise that Eero was helping his father design furniture and fixtures for the Cranbrook campus by the time he was in his teens.

Eero Saarinen (1910-1961) Finnish American architect and industrial designer, Eero Saarinen was noted for his neo-futuristic style. He was best known for designing the Washington Dulles International Airport outside Washington, DC and the TWA Flight Center in New York City. Picture of Eero Saarinen

Eero Saarinen was one of the 20th century's great visionaries, both in the fields of furniture design and in architecture. Marrying curves and dynamic forms with a Modernist aesthetic, he brought a whole new dimension to architecture.

Eero Saarinen (1910-1961) was one of the 20th century's great visionaries, both in the fields of furniture design (he created the ubiquitous Knoll "Tulip" chairs and tables, for example) and in architecture. Among his greatest accomplishments are monuments that shaped architecture in postwar America and became icons in themselves: Washington D.C.'s Dulles International Airport, the very sculptural and fluid TWA terminal at JFK Airport in New York, and the 630-foot high "Gateway to the West," the Arch of St. Louis. Marrying curves and dynamic forms with a modernist aesthetic, he brought a whole new dimension to architecture.

From the swooping concrete vaults of the TWA Terminal at JFK Airport to the 630-foot-tall Gateway Arch in St. Louis, the iconic designs of Eero Saarinen (1910-1961) captured the aspirations and values of mid-20th-century America. Potent expressions of national power, these and other Saarinen-designed structures--including the GM Technical Center, Dulles International Airport, and John Deere headquarters--helped create the international image of the United States in the decades following World War II. "Eero Saarinen: Shaping the Future" offers a new and wide-ranging look at the entire scope of Saarinen's career. This is the first book on Saarinen to incorporate significant research and materials from the newly available archives of his office, and includes the most complete portfolio of Saarinen's projects to date--a chronological survey of more than 100 built and unbuilt works, previously unpublished photographs, plans, and working drawings. Lavishly illustrated, this major study shows how Saarinen gave his structures an expressive dimension and helped introduce modern architecture to the mainstream of American practice. In his search for a richer and more varied modern architecture, Saarinen became one of the most prolific and controversial practitioners of his time. Exhibition schedule: Helsinki Kunsthalle, Finland (October 6--December 6, 2006) Centre International pour la Ville, l'Architecture et le Paysage (CIVA), Brussels (Spring 2007) National Building Museum, Washington, D.C. (Winter / Spring 2008) Additional venues to be determined

Eero Saarinen (1910-1961) foi um dos grandes visionários do século vinte, tanto nos campos de designer de móveis (ele criou as cadeiras e mesas 'Tulip', por exemplo) quanto na arquitetura. Entre suas realizações estão monumentos que moldaram a arquitetura

It has spawned a recent rash of imitators, but many critics believe it to be the best. Now available in paperback, it's also the most affordable. "The text is filled with crisp, beautiful black- and -white photographs of interiors and exteriors as well as images of models and architectural drawings. The photographs are especially striking, as they were taken at or near the time of each structure's completion, documenting its clean, striking presence. This is the most complete title available on this architect. a " Library Journal "Historian Romana (TM)s book fills a major void, for examination of this legacy has been strikingly meager. He provides a thoughtful, and engaging introduction... He offers many insights on the architect's ideas and methods. An elegant assortment of period photographs accompanies the text. This accomplished publication should have widespread appeal for all persons interested in modern architecture. Highly Recommended. a " CHOICE

Long before Microsoft or Apple occupied their legendary corporate campuses, there was the General Motors Technical Center in Warren, Michigan. Completed in 1956 and designated a National Historic Landmark in 2014, this icon of midcentury design was celebrated modern architect Eero Saarinen's (1910 – 1961) first major commission completed independent of his father, Eliel Saarinen, and its story offers a unique perspective on his work. Longtime GM designer Susan Skarsgard weaves a detailed insider's account of the early days of General Motors, the initiation of the technical center project under Eliel Saarinen, its design and construction under Eero Saarinen, and the enthusiastic acclaim the campus received upon its opening. Many leading lights of midcentury modernism were involved in the project as design consultants or artists, including Harry Bertoia, Alexander Girard, Florence Knoll, and Alexander Calder. This lavishly illustrated account is a unique document of a landmark project, presented in photographs and architectural drawings, interviews, documents, and ephemera, many never before seen.
