Elementi di teoria politica Giovanni Sartori. LA COSTITUZIONE. Sartori cerca di affrontare varie questioni riferite alla costituzione: il termine costituzione che pertiene al costituzionalismo è moderno; è stato inteso per almeno un secolo e mezzo in un preciso significato garantistico; che il positivismo giuridico e la definizione formale di costituzione ne hanno deformato il significato e ...

Strutturandosi per voci, "Elementi di teoria politica" è tanto un ottimo manuale per studenti di Scienze politiche quanto un buon libro per il cittadino responsabile e interessato a capire un po' di più il mondo in cui viviamo. Particolarmente interessante, in questo periodo di facili e pericolosi proclami, il capitolo "Democrazia".

This book collects a series of philosophical papers dedicated to the figure and work of Daisaku Ikeda. The author's interest in studying Ikeda's work is not to carry out a specialised or disciplinary study of his Buddhist exegesis, or to offer a critical synthesis from the point of view of its basic doctrinal contents and references, nor to examine his creed and religious teaching. Beyond the fact that Ikeda's work has the double face of a construction founded on a Japanese philosophical-religious tradition with specific links to classical Chinese tradition, interfaced with the globe's most representative literary, scientific and speculative cultural products, it was developed according to an intercultural design strongly marked by western rationality and a spiritual-speculative-pragmatic approach to life and the world. Throughout this book, the author proposes an agnostic suspension in order to leave a place for philosophy and its argumentative constructions.

This book analyzes the relationship between art and politics in two contrasting modern dictatorships. Through a detailed look at the Chilean and Romanian dictatorships, it compares the different ways in which political regimes convey their view of the world through artistic means. It examines how artists help \ convey a new understanding of politics and political action during repressive regimes that are inspired by either communism or anti-communism (neoliberalism, traditionalist, conservative). This book demonstrates how artistic renderings of life during dictatorships are similar in more than one respect, and how art can help better grasp the similarities of these regimes. It reveals how dictatorships use art to symbolically construct their power, which artists can consolidate by lending their support, or deconstruct through different forms of artistic resistance.

This book is a highly original and provocative contribution to democratic theory. Zolo argues that the increasing complexity of modern societies represents a fundamental challenge to the basic assumptions of the Western democratic

tradition and calls for a reformulation of some of the key questions of political theory. Zolo maintains that, as modern societies become more complex and more involved in the 'information revolution', they are subjected to new and unprecedented forms of evolutionary stress - as manifested, for instance, in the growing autonomy and power of political parties, and in new kinds of political communication which create and sustain the fiction of consensus. These forms of stress have become so serious that they threaten to undermine some of the values traditionally associated with democracy, such as the rationality and autonomy of the individual, and the visibility and accountability of power.

Over the last fifteen years, the South African postapartheid Transitional Amnesty Process - implemented by the Truth and Reconciliation Commission (TRC) - has been extensively analyzed by scholars and commentators from around the world and from almost every discipline of human sciences. Lawyers, historians, anthropologists and sociologists as well as political scientists have tried to understand, describe and comment on the 'shocking' South African political decision to give amnesty to all who fully disclosed their politically motivated crimes committed during the apartheid era. Investigating the postapartheid transition in South Africa from a multidisciplinary perspective involving constitutional law, criminal law, history and political science, this book explores the overlapping of the postapartheid constitution-making process and the Amnesty Process for political violence under apartheid and shows that both processes represent important innovations in terms of constitutional law and transitional justice systems. Both processes contain mechanisms that encourage the constitution of the unity of the political body while ensuring future solidity and stability. From this perspective, the book deals with the importance of several concepts such as truth about the past, publicly shared memory, unity of the political body and public confession.

The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation. More recently, this belief that there is no viable alternative has held firm despite the financial crisis, high unemployment levels and an ever-increasing gap between rich and poor. However, since the appearance of Benjamin Ward's seminal 1958 article, economic theorists have been developing a workable alternative: a system of self-managed firms. The core argument outlined in this book is that a well-organised system of producer cooperatives would give rise to a new mode of production and, ultimately, a genuinely socialist society. This argument is developed through three key steps. First, following on from Jaroslav Vanek's definition, it is argued that a 'Labour-Managed Firm', a firm which strictly segregates capital incomes from labour incomes, would implement a new production mode because it would reverse the pre-existing relation between capital and labour. Second, given that a system of these 'Labour-Managed Firm' cooperatives would reverse the capital-labour relationship, it is suggested that this would constitute a form of market socialism. Third, it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages, including the potential for efficiency gains, the eradication of unemployment and the end of exploitation. Ultimately, this book concludes that self-management could take the place of central planning in Marxist visions for the future.
