Michael ist nach dem Tanach ein Erzengel und kommt in den Traditionen des Judentums, Christentums und Islams vor. Anders als im Christentum wird der Engel Michael im Judentum nie mit „Attributen der Göttlichkeit“ versehen.[1] In der neutestamentlichen Offenbarung des Johannes tritt Michael in einem eschatologischen Kontext als Bezwinger Satans auf, den er auf die Erde hinabstürzt .

A historical look at the emergence of fascism in Europe Drawing on a Gramscian theoretical perspective and development a systematic comparative approach, The Civic Foundations of Fascism in Europe: Italy, Spain and Romania 1870-1945 challenges the received Tocquevillian consensus on authoritarianism by arguing that fascist regimes, just like mass democracies, depended on well-organized, rather than weak and atomized, civil societies. In making this argument the book focuses on three crucial cases of inter-war authoritarianism: Italy, Spain and Romania, selected because they are all counter-intuitive from the perspective of established explanations, while usefully demonstrating the range of fascist outcomes in interwar Europe. Civic Foundations argues that, in all three cases, fascism emerged because the rapid development of voluntary associations combined with weakly developed political parties among the dominant class thus creating a crisis of hegemony. Riley then traces the specific form that this crisis took depending on the form of civil society development (autonomous- as in Italy, elite dominated as in Spain, or state dominated as in Romania) in the nineteenth century.

The Dictionary of Deities and Demons in the Bible (DDD) is the single major reference work on the gods, angels, demons, spirits, and semidivine heroes whose names occur in the biblical books. Book jacket.

"A study of the representations of St. Michael in the liturgy, literature, and iconography of the period"—Provided by publisher.

This book examines the narratives of the two Greek recensions of the Testament of Abraham. The genre, characterization, and plot of each recension are discussed and then compared. Ludlow illustrates that Recension A used comedy and humour to give a sophisticated treatment of death, the figure death, and judgment and mercy. Through a careful comparison of narrative elements and vocabulary correspondences between the manuscripts of each recension, he discusses a possible transmission model for the recensions, concluding that Recension A, written in comic form, preceded Recension B. Recension B then excised most of these comic elements.

Late Antiquity witnessed a dramatic recalibration in the economy of power, and nowhere was this more pronounced than in the realm of religion. The transformations that occurred in this pivotal era moved the ancient world into the Middle Ages and forever changed the way that religion was practiced. The twenty eight studies in this volume explore this shift using evidence ranging from Latin poetic texts, to Syriac letter collections, to the iconography of Roman churches and Merovingian mortuary goods. They range in chronology from the late third through the early seventh centuries AD and apply varied theories and approaches. All converge around the notion that religion is fundamentally a discourse of power and that power in Late Antiquity was especially charged with the force of religion. The articles are divided into eight sections which examine the power of religion in literature, theurgical power over the divine, emperors and the deployment of religious power, limitations on the power of the ecclesiastical hierarchy, the use of the cross as a symbol of power, Rome and its transformation as a center of power, the power of religion in the barbarian west, and religious power in the communities of the east. This kaleidoscope of perspectives creates a richly illuminating volume that add a new social and political dimension to current debates about religion in Late Antiquity.

In recent years scholars have increasingly challenged and reassessed the once established concept of the 'crisis of the nobility' in early-modern Europe. Offering a range of case studies from countries across Europe this collection further expands our understanding of just how the nobility adapted to the rapidly changing social, political, religious and cultural circumstances around them. By allowing readers to compare and contrast a variety of case studies across a range of national and disciplinary boundaries, a fuller - if more complex - picture emerges of the strategies and actions employed by nobles to retain their influence and wealth. The nobility exploited Renaissance science and education, disruptions caused by war and religious strife, changing political ideas and concepts, the growth of a market economy, and the evolution of centralized states in order to maintain their lineage, reputation, and position. Through an examination of the differing strategies utilized to protect their status, this collection reveals much about the fundamental role of the 'second order' in European history and how they had to redefine the social and cultural 'spaces' in which they found themselves. By using a transnational and comparative approach to the study of the European nobility, the volume offers exciting new perspectives on this important, if often misunderstood, social group.

A new view on the various possibilities to experience and to perceive the Holy Roman Empire in the late medieval imperial cities Augsburg, Nürnberg und Lübeck. Einen neuen Blick auf die Möglichkeiten, das Reich in den spätmittelalterlichen Reichsstädten Augsburg, Nürnberg und Lübeck zu erfahren und wahrzunehmen.

Early Christians sought miracles from Michael the Archangel and this enigmatic ecumenical figure was the subject of hagiography, liturgical texts, and relics across Western Europe. Entering contemporary debates about angelology, this fascinating study explores the formation and diffusion of the cult of Saint Michael from c. 300-c.800.
