You obviously wish to improve yourself in the arena of selling, or else you would not be reading these words right now. That is why Mark Benedict was so careful and dedicated in his research to find the best sources and resources on selling he could from all around the world. With over 70 creative selling techniques, you are sure to have most of your sales questions answered. Presented in an easy to read format, The Method of Selling will make your selling experience an enjoyable and much more profitable one.

The book provides an illuminating background of the political history of the Soviet cinema in the twenties.

Title: C Programming Language Keywords: C Programming, C Language, C Programming Language This C Programming Language book is carefully formatted for kindle edition. Read on mac, pc, smart phone, tabs, fire, etc. This book is for absolute beginners with or without prior knowledge in programming, as this book uses Simple words, Short sentences, and Straightforward paragraphs. The triple S way of learning C language programming. The topics covered in this book includes brief introduction to C language, variables, data types, control structures, functions, pointers, and input and output stream to external files. This book starts its discussion from short history to installation of the needed software resource and a step by step screen shots of how to write C language code, compile and execute C programs. It presents graphical representation of algorithms for simpler learning. This book is packed with working and running C program samples and after reading this book, the reader would be able to develop and create C language programs based particularly from problems given in computer science courses, hence, adopting to other programming language will be a lot easier. This book is your first step in your programming career. Get your copy now while this book is on sale at \$3.44! Summary of Topics covered: Chapter 1 - Starting C Language Programming Reasons to use C Language Beginning to Program in C Language Installing the Dev-C++ Installing compiler for Linux Chapter 2 - Our First C Language Program The components of a C program Writing, compiling, and running our first program using Dev-C++ for Windows, and Linux Correcting errors Statements Null Statements White spaces Chapter 3 - Storing Data: Variables and Data Types in C Language Variable Declaration and definition Scope of variables Constants Keywords Conversion specifiers of data types Chapter 4 - Fundamentals of Input And Output in C Language Displaying text on-screen Literal text An escape sequence Accepting user input Chapter 5 - Arrays and Strings in C Language Single-Dimensional Multi-Dimensional Array Strings Declaring and defining a string Defining a string using input functions Strings' pre-defined functions Chapter 6 - Mathematical Operations in C Language Expressions Operators Assignment Mathematical Binary Unary Precedence level and parentheses Relational Logical Type Casting Pre-defined Mathematical Functions Chapter 7 - Conditional Statements in C language if() statement Single-alternative Dual-alternative Multiple-alternative Nested if() statement The switch() statement Things to consider in conditional

statementChapter 8 - Looping Statements in C LanguageCounter-controlled loopfor() loop statementNested for() loop statementCondition-controlled loopPre-test loopPost-test loopThe Infinite LoopChapter 9 - User-Defined Functions in C LanguageUser-defined function , prototype, definitionCalling a user-defined functionThings to consider in functions:Chapter 10 - User-Defined Data Types in C LanguageStructuresDeclaring and Defining a structureAccessing MembersCompound declaration and definition of structureChapter 11 - Pointer in C LanguagePointer Declaration and definitionHow pointers works?Pointer ArithmeticChapter 12 - File Management in C LanguageFile management in CDefining and opening a fileClosing a FileReading and writing a fileputc() and getc() functionsprintf() and fscanf() functionsDeleting a FileRenaming a FileEach chapter presents a Self-assessment questions.To GOD be all the glory!

This collection of literature attempts to compile many of the classic works that have stood the test of time and offer them at a reduced, affordable price, in an attractive volume so that everyone can enjoy them.

This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English (long sentences, redundancy, poor structure etc). It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises are organized into ten chapters on: punctuation and spelling word order writing short sentences and paragraphs link words - connecting phrases and sentences together being concise and removing redundancy ambiguity and political correctness paraphrasing and avoiding plagiarism defining, comparing, evaluating and highlighting anticipating possible objections, indicating level of certainty, discussion limitations, hedging, future work writing each section of a paper Some exercises require no actual writing but simply choosing between various options, thus facilitating self-study, e-reading and rapid progress. In those exercises where extended writing is required, model answers are given. Exercise types are repeated for different contexts, for example the importance of being concise is tested for use in papers, referees' reports, and emails of various types. Such repetition of similar types of exercises is design ed to facilitate revision. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series and is cross-referenced to: English for Research: Usage, Style, and Grammar English for Writing Research Papers

Engineering Drawing From First Principles is a guide to good draughting for students of engineering who need to learn how to produce technically accurate and detailed designs to British and International Standards. Written by Dennis Maguire, an experienced author and City and Guilds chief examiner, this text is designed for use on Further Education and University courses where a basic understanding of draughtsmanship and CAD is necessary. Although not written as an AutoCAD tutor, the book will be a useful introduction to good CAD practice. Part of the Revision and Self-Assessment series, 'Engineering Drawing From First Principles' is ideal for the student working alone. More than just a series of tests, the book helps assess current understanding, diagnose areas of weakness and directs the student to further help and guidance. This is a self-contained text, but it will also work well in conjunction with the highly successful 'Manual of Engineering Drawing', by Simmons and Maguire. Can be used with AutoCAD or AutoCAD LT Provides typical exam questions and carefully described worked solutions Allows students to work alone
