Infection may be manifest by benign, cauliflower-like lesions typically located on fins. The disease affects a wide range of fish and is generally considered to have a global distribution.

Viral Diseases of Fish - Exotic and Laboratory Animals ...

Ramirez’ dwarf cichlid virus is a viral entity that has been visualized in the spleen of the South American tropical fish Apistogramma ramirezi, which was a victim of an acute disease with high-morbidity. Other pathogens were not detected, and although isolation was not attempted, the virus is considered to be the etiologic agent of the lethal disease (Leibovitz and Riis 1980a, b).

Fish Viruses and Fish Viral Diseases on JSTOR

In 1904 Bruno Hofer in his book on fish diseases discussed carp pox and thought it was a secondary effect of a myxosporidian infection; he also mentions that Konrad Gesner noted this disease in 1563. The viral nature of lymphocystis disease was proposed by Weissenberg in 1914. By the 1950s at least six viral diseases of fish had been recognised and by the 1960s this had increased to 17.

Fish viruses and fish viral diseases. - CAB Direct

The viral nature of lymphocystis disease was proposed by Weissenberg in 1914. By the 1950s at least six viral diseases of fish had been recognised and by the 1960s this had increased to 17. Since then the pace of discovery in fish virology has accelerated and this book describes 51 virus infections and another 8 infections with virus-like particles.

Fish Viruses And Fish Viral Diseases

For these reasons, viral agents of many fish are often suspected based on visualization of viral particles in tissues taken from sick fish using EM. The problem with this tool, when used alone, is that it is possible for viral particles to be present in tissue without causing harm, or disease.

Introduction to viral diseases of fish - Aquaculture

Fish become lethargic, have pale anemic gills, darken skin coloration, exophthalmus, and distention of the abdominal cavity. Internal organs are commonly involved with splenomegaly, hepatomegaly, and swollen kidneys. Turbot, sea bass, and Atlantic salmon are commonly affected by similar viruses.

Viral Diseases of Fish - cichlid-forum.com

In vitro studies demonstrated that chum salmon reovirus (CSV; aquareovirus A) and two alloherpesviruses cyprinid herpesvirus 1 (CyHV-1) and cyprinid herpesvirus 3 (CyHV-3) are able to replicate in zebrafish cell lines ZF4 and SJD.1.

Evaluation of zebrafish (Danio rerio) as an animal model ...

Viral hemorrhagic septicemia is a deadly infectious fish disease caused by Piscine novirhabdovirus. It afflicts over 50 species of freshwater and marine fish in several parts of the Northern Hemisphere. Different strains of the virus occur in different regions, and affect different species. There are no signs that the disease affects human health. VHS is also known as Egtved disease, and the virus as Egtved virus. Historically, VHS was associated mostly with freshwater salmonids in western Europ

Viral hemorrhagic septicemia - Wikipedia

Without doubt, the three most important fish rhabdoviruses are infectious hematopoietic necrosis virus (IHNV) and viral hemorrhagic septicemia virus both in genus Novirhabdovirus, and spring viremia of carp virus in genus Sprivivirus; these three viruses are covered in this chapter. All three are World Organization for Animal Health (OIE) reportable diseases and can have a considerable economic impact due to clinical disease, production loss and trade or regulatory costs.

Aquaculture Virology | ScienceDirect

Infectious salmon anemia is a viral disease of Atlantic salmon caused by Salmon isavirus. It affects fish farms in Canada, Norway, Scotland and Chile, causing severe losses to infected farms. ISA has been a World Organisation for Animal Health notifiable disease since 1990. In the EU, it is classified as a non-exotic disease, and is monitored by the European Community Reference Laboratory for Fish Diseases.

Salmon isavirus - Wikipedia

Viruses can be difficult to detect, especially when they are in a latent phase and the fish appear healthy. It is possible that CEV is more widespread in the UK than the 10 currently confirmed fishery sites. Extreme caution must be taken to prevent further spread of this virus.

Carp Edema Virus (CEV) | Guide to fish health | Canal ...

Viral hemorrhagic septicemia (VHS) is a disease caused by a virus (VHSV). There are different strains of the virus that can infect marine and freshwater fish species, and the different strains may affect species differently. VHSV has recently invaded the Great Lakes, resulting in many large-scale fish die-offs and new regulatory restrictions for aquaculture throughout the region.

Viral Hemorrhagic Septicemia (VHS) Virus | The Fish Site

The book covers well-studied, notifiable piscine viruses and bacteria, including new and emerging diseases which can become huge threats to local fish populations in new geographical regions if transported there via infected fish or eggs. A concise but thorough reference work, this book:

Fish Viruses and Bacteria - CABI.org

Most belong to virus families known to infect birds and mammals. For example, some fish harbour viruses that are related to Ebola, which causes a deadly disease in primates, including people....
