The National Trust said they would be working with others across the environmental and farming sector to see how these changes might be made during the Lords stages of the agriculture bill.

Farmers urge UK government to protect food standards in ... In a study published in Environmental Science & Technology, Christopher Weber and Scott Matthews (2008) investigated the relative climate impact of food miles and food choices in households in the US. 18 Their analysis showed that substituting less than one day per week's worth of calories from beef and dairy products to chicken, fish, eggs, or a plant-based alternative reduces GHG emissions more than buying all your food from local sources.

Environmental impacts of food production - Our World in Data CAP reforms have made attempts to address environmental damage from agriculture by paying farmers to manage farmland for environmental benefits through voluntary agri-environment scheme (AES) agreements. More recently, farmers have been required to implement environmental measures in order to receive a proportion of their direct payment.

...

Food hygiene legislation is closely related to the legislation on the general requirements and principles of food law but specifically concerns the microbiological safety of food. The legislation lays down the food hygiene rules for all food businesses, applying effective and proportionate controls throughout the food chain, from primary production to sale or supply to the food consumer.
