Game Theory Solutions & Answers to Exercise Set 2
Giuseppe De Feo May 10, 2011
Exercise 1 (Cournot duopoly) Market demand is given by $P(Q) = (140 - Q)$ if $Q < 140$ 0 otherwise
There are two firms, each with unit costs = \$20. Firms can choose any quantity.
1. Determine the reaction functions of the firms;
2. Find the Cournot equilibrium;

Game Theory [Answers] - Solution manual Strategy - ITD20 ...

Solution: From theory $S_1 = \text{argmax} \min u_1(s_1', s_2)$ $p = \text{probab. 1 plays L}$
If $p > 1/2$, $s_2 = R$ leads 1 to earn $1 - 2p < 0$; - If $p < 1/2$, $s_2 = L$ leads 1 to earn $2p - 1 < 0$; - If $p = 1/2$, then regardless of 2's strategy 1 earns 0. - Thus $p = 1/2$ is the maximin strategy 1.

An introduction to game theory by Martin J. Osborne: Solutions: Publicly-available solutions Solutions to all the exercises marked in the book as being publicly-available are contained in a pdf file (version 6, 2012-4-7). (If you find errors in these solutions, please let me know.)

Solutions for exercises in "An introduction to game theory"

Answer: The optimal solution is obtained by maximizing the payoff function $() = -4 - 2$. The first-order maximization condition is $-8 = 0$ implying that $= 8$ is the optimal solution. For $= 1$ the solution is $= 1$ and for $= 4$ it is $= 1 - 2$. ¥ (c)
Show that in general, smaller people should drink less than larger people.

Solution Manual Game Theory: An Introduction

Answer 1. 2 B is strictly dominated by T. C is now strictly dominated by R. The strategies (T,M) and (L,R) survive the iterated elimination of strictly dominated strategies. The Nash Equilibrium are (T,R) and (M,L). Answer 1. 3 For whatever value Individual 1 chooses (denoted by S_1), Individual 2's best response is $S_2 = B_2(S_1) = 1 - S_2$.

Navin Kumar - The Unofficial Solutions Manual to A Primer ...

a. The equilibria of the game are the same as those of the original game: (Stag, ..., Stag) and (Hare, ..., Hare). Any player that deviates from the first profile obtains a hare rather than the fraction $1/n$ of the stag. Any player that deviates from the second profile obtains nothing, rather than a hare.

Solution Manual An introduction to game theory - UvA ...

Solutions Manual to accompany Game Theory: An Introduction, 2nd Edition provides complete explanations and fully worked solutions for the problems posed in the text. Although designed as a supplement to Game Theory, this solutions guide is versatile enough to act as an independent review of key topics, regardless of which textbook you are using. Each solution includes the original question as well as all given data, and clear, concise language describes the approach and

Solutions Manual to Accompany Game Theory: An Introduction ...

This textbook presents worked-out exercises on game theory with detailed step-by-step explanations. While most textbooks on game theory focus on theoretical results, this book focuses on providing practical examples in which students can learn to systematically apply theoretical solution concepts to different fields of economics and business.

Strategy and Game Theory - Practice Exercises with Answers ...

Game Theory Tutorial 3 Answers Exercise 1 (Duality Theory) Find the dual problem of the following L.P. problem: $\max x_0 = 3x_1 + 2x_2$ s.t. $5x_1 + 2x_2 \leq 10$ $4x_1 + 6x_2 \leq 24$ $x_1 + x_2 \geq 1$ $x_1 + 3x_2 = 9$ $x_1 \geq 0$. (1) Solution: We are going to use rules (1), (2) and (3) from your notes to find the dual of (1). $\min y_0$ $x_1 \geq 0$ x_2 free $y_1 \geq 0$ $5 \cdot 2 \leq 10$ $y_2 \geq 0$ $4 \cdot 6 \leq 24$ $y_3?$
 $1 \cdot 1 \geq 1$

Game Theory Tutorial 3 Answers

Game theory is divided into two main branches. The first is cooperative game theory, which assumes that the players can communicate, form coalitions and sign binding agreements. Cooperative game theory has been used, for example, to analyze voting behavior and other issues in political science and related fields. We will deal exclusively with ...
