Hearing Loss And Healthy Aging

The key elements of the standard, which are important for older people with hearing loss, whether the older person is living at home or in a care home, are:

- A care plan needs to be in place for each person. This plan should include identifying needs arising from mental health, physical, social and sensory problems.

HEARING LOSS AND HEALTHY AGEING - NHS England

A threat to independence, safety, and healthy aging, age-related hearing loss (ARHL) is underreported, under-identified, and undertreated.

On Hearing Loss and Healthy Aging : The Hearing Journal

Health conditions common in older people, such as diabetes or high blood pressure, can contribute to hearing loss. Viruses and bacteria (including the ear infection otitis media), a heart condition, stroke, brain injury, or a tumor may also affect your hearing.
