An Illustrated Guide to Furniture History provides upper-level students and instructors with an alternative visual analytical approach to learning about furniture history from Antiquity to Postmodernism. Following an immersive teaching model, it presents a Nine-Step Methodology to help students strengthen their visual literacy and quickly acquire subject area knowledge. Moving chronologically through key periods in furniture history and interior design, such as the Renaissance, the Arts and Crafts Movement, and Modernism, it traverses Europe to America to present a comprehensive foundational guide to the history of furniture design. Part I addresses furniture within the context of the built environment, with chapters exploring the historical perspective, construction principles, and the categorization of furniture. In Part II, the author visually depicts the structural organization of the methodological process, a three-category framework: History, Aesthetics, and Visual Notes. The chapters in this part prepare the reader for the visual analysis that will occur in the final section of the book. The book is lavishly illustrated in full color with over 300 images to reinforce visual learning and notation. A must-have reference and study guide for students in industrial and product design, interior design, and architecture.
