Name Key Period Study Guide for Test on the Integumentary ...

The integumentary system refers to the skin and its accessory structures, and it is responsible for much more than simply lending to your outward appearance. In the adult human body, the skin makes up about 16 percent of body weight and covers an area of 1.5 to 2 m². In fact, the skin and accessory structures are the largest organ system in the human body. As such, the skin protects your inner organs and it is in need of daily care and protection to maintain its health.

Integumentary System Study Guide Flashcards | Quizlet

Skin, or the integumentary system, is a great place to begin a tour through the human body systems. There are a lot of connections that can be made between this unit and the histology and cells units. The vocabulary and number of structures in this unit is not as overwhelming as some of the later body systems.

The Integumentary System: Teaching Resources ...

Functions of the Integumentary system 1. protection a) chemical factors in the skin: Sebum (or oil) from the sebaceous glands is slightly acidic, retarding bacterial colonization on the skin surface. Sweat from the sudoriferous glands is slightly hypertonic and can flush off most bacteria on the skin surface.
