## Modification Part 2 FULL MOD

The following features are updated. 1.  
Adds ability to activate the APRS (or  
PACKET) mode and the EchoLink Sysop  
mode simultaneously (TM-D710A/E). It  
enables the TM-D710A/E to operate as  
an APRS base station or a digipeater even  
while the TM-D710A/E's EchoLink node

Kenwood D710 software works well on a Windows 8 tablet allowing me to easily clone the radios. I installed a VGS1 voice module as well and enjoy the features that

# Access PDF Kenwood Tm D710 Mods

offers. It even speaks Japanese on the voice guide, if selected, keeping me up to speed. Crossband operation is plenty of fun and the D710 makes it easy.
