homes perfectly suited to each one. However, the animals were unhappy with the places that

God had made for them and eventually gave into the insecurities and fears they all felt. Owl was frightened of the dark, Mountain Goat became faint-hearted as he looked down from the narrow mountain ledge. Duck panicked every time she neared the water. Camel detested the hot, dry wind and Penguin hated the icy cold. Through whimsical illustrations and creative prose, “ God Gave Me Everything I Need To Be Me! ” encourages self acceptance, individuality and appreciation as the animals finally realize God had given them exactly what each one required to make them complete.

anyone whose heart is open and whose mind is still enough to hear that gentle voice speak to them. It is then that we realize how much our heavenly Father loves each one of us and wants us all to have a close relationship with Him. My name is Elisabeth, and this is my journey with the Lord. I was given this opportunity to share a part of my life with you. Alma, my sister, is truly blessed and has accompanied me through this journey. Some of the pictures and most of the inspirational messages associated with the pictures were given to Alma for us to use in this book. The pictures are all a gift from God. For this we humbly thank Him and our Blessed Mother, for allowing us to be a part of God ' s plan.

The starship Ariel is on a mission of the utmost secrecy, upon which the fate of thousands of lives depend. Though the ship is a mile long, its six crew are crammed into a space barely large enough for them to stand. Five are officers, geniuses in their field. The other is Will Kuno-Monet, the man responsible for single-handedly running a ship comprised of the most dangerous and delicate technology that mankind has ever devised. He is the Roboteer. Roboteer is a hard-SF novel set in a future in which the colonization of the stars has turned out to be anything but easy, and civilization on Earth has collapsed under the pressure of relentless mutual terrorism. Small human settlements cling to barely habitable planets. Without support from a home-world they have had to develop ways of life heavily dependent on robotics and genetic engineering. Then out of the ruins of Earth's once great empire, a new force arises - a world-spanning religion bent on the conversion of all mankind to its creed. It sends fleets of starships to reclaim the colonies. But the colonies don't want to be reclaimed. Mankind's first interstellar war begins. It is dirty, dangerous and hideously costly. Will is a man bred to interface with the robots that his home-world Galatea desperately needs to survive. He finds himself sent behind enemy lines to discover the secret of their newest weapon. What he discovers will transform their understanding of both science and civilization
