A laboratory information management system, sometimes referred to as a laboratory information system or laboratory management system, is a software-based solution with features that support a modern laboratory's operations. Key features include—but

# Systems And

# Where To Download

are not limited to—workflow and data tracking support, flexible architecture, and data exchange interfaces, which fully "support its use in regulated environments". The features and uses of a LIMS have evolved over the years from simple sample ...

November 29, 1999.

In the typical

Systems And

# Where To Download

scientific laboratory  
there is a large  
amount of data that  
must be tracked and  
analyzed. In my  
current work setting  
we collect data from  
outside laboratories,  
analyze the data, and  
then return the data.
