Eve Adams was a rebel. Born Chawa Zloczewer into a Jewish family in Poland, Adams emigrated to the United States in 1912. The young woman befriended anarchists, sold radical publications, took a new name, and ran lesbian-and-gay-friendly speakeasies in Chicago and New York. Then, in 1925, Adams risked all to write and publish a book titled Lesbian Love. In a repressive era, long before today's gay liberation movement, when American women had just gained the right to vote, Adams's bold activism caught the attention of the young J. Edgar Hoover and the US Bureau of Investigation, leading to her surveillance and arrest. In a case that pitted immigration officials, the New York City police, and a biased informer against her, Adams was convicted of publishing an obscene book and of attempted sex with a policewoman sent to entrap her. Adams was jailed and then deported back to Europe, and ultimately murdered by Nazis in Auschwitz. In *Sex Rebel: The Daring Life and Deadly Times of Eve Adams*, acclaimed historian Jonathan Ned Katz has recovered the extraordinary story of an early, daring activist. Drawing on startling evidence, carefully distinguishing fact from fiction, Katz presents the first biography of Adams, and the publisher reprints the long-lost text of Adams's rare, unique book *Lesbian Love*.

In an era of climate change, the need to manage our water resources effectively for future generations has become an increasingly significant challenge. Indigenous management practices have been successfully used to manage inland water systems around the world for thousands of years, and Indigenous people have been calling for a greater role in the management of water resources. As First Peoples and as holders of important knowledge of sustainable water management practices, they regard themselves as custodians and rights holders, deserving of a meaningful role in decision-making. This book argues that a key (albeit not the only) means of ensuring appropriate participation in decision-making about water management is for such participation to be legislatively mandated. To this end, the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation, consultation and representation in the water management landscape.

In the Fourth Edition of *Cultures and Societies in a Changing World*, author Wendy Griswold illuminates how culture shapes our social world and how society shapes culture. Through this book, students will gain an understanding of the sociology of culture and explore stories, beliefs, media, ideas, art, religious practices, fashions, and rituals from a sociological perspective. Cultural examples from multiple countries and time periods will broaden students' global understanding. Students will develop a deeper appreciation of culture and society from this text, gleaning insights that will help them overcome cultural misunderstandings, conflicts, and ignorance and that will help equip them to live their professional and personal lives as effective, wise citizens of the world.

This investigation of the fundamental character of organizational identity and identification with an organization is arranged in the form of a provocative discussion between key scholars. The book focuses on three different paradigmatic views of identity: functionalist, interpretive and postmodern. Similarities and distinctions among these ways of understanding are explored, and numerous theoretical and practical insights are gained. The book concludes with a discussion of the relevance of identity as a construct in organizational study, and observations on conversation and theory building.

Motor Learning and Performance: From Principles to Application, Sixth Edition With Web Study Guide, enables students to appreciate high-level skilled activity and understand how such incredible performances occur. Written in a style that is accessible even to students with little or no knowledge of physiology, psychology, statistical methods, or other basic sciences, this text constructs a conceptual model of factors that influence motor performance, outlines how motor skills are acquired and retained with practice, and shows students how to apply the concepts to a variety of real-world settings. The sixth edition of *Motor Learning and Performance* has been carefully revised to incorporate the most important research findings in the field, and it is supplemented with practice situations to facilitate a stronger link between research-based principles and practical applications. Other highlights include the following: A web study guide offers updated principles-to-application exercises and additional interactive activities for each chapter, ensuring that students will be able to transfer core content from the book to various applied settings. Extensive updates and new material related to the performance of complex movements expand the theoretical focus to a more in-depth analysis of dynamical systems and the constraints-led approach to learning. Narratives from *Motor Control in Everyday Actions* that appear in

the web study guide tie each book chapter to concrete examples of how motor behavior is applicable to real life. Photo caption activities pose questions to students to encourage critical thinking, and answers to those questions are provided to instructors in the instructor guide. As the text investigates the principles of human performance, pedagogical aids such as learning objectives, key terms, and Check Your Understanding questions help students stay on track with learning in each chapter. Focus on Research and Focus on Application sidebars deliver more detailed research information and make connections to real-world applications in areas such as teaching, coaching, and therapy. The sixth edition of Motor Learning and Performance: From Principles to Application goes beyond simply presenting research—it challenges students to grasp the fundamental concepts of motor performance and learning and then go a step further by applying the concepts. Incorporating familiar scenarios brings the material to life for students, leading to better retention and greater interest in practical application of motor performance and learning in their everyday lives and future careers.
