Logic PRO have changed the game, providing pre-filled e-liquid capsules to provide the reliability and quality of an open tank vape with the convenience of a disposable. Simply pop in a new capsule and go. Built-in Coils - Pod vapes often fall down when the coil wears out, leading to a need for maintenance and replacement parts, and an unappealing 'burnt taste' as a result of the old coil. To ...

First, call up help from Logic Pro X then select Logic Pro Help. Once Logic Pro Help opens, open in Safari to get the URL that you'll use in your mobile device. Now just click in the URL text area and see the full URL. As you can see I've pointed out it says 10.2.3 which is okay since version numbers do have special meanings.

If the Independent Monitoring Level (for Record Enabled Channel Strips) option in the Logic Pro > Preferences > Audio > Devices > Core Audio tab is enabled, an independent monitoring level is available when an audio channel strip is record enabled. After you arm the track, set the fader to the desired level. The original playback level will be restored when the channel strip's Record button ...

Setting the Monitoring Level for Recording

Logic Remote Touch and flow. Logic Remote lets you use your iPhone or iPad to control Logic Pro on your Mac. Use Multi-Touch gestures to play software instruments, mix tracks, and control features like Live Loops and Remix FX from anywhere in the room. Swipe and tap to trigger cells in Live Loops.

Logic Pro - Apple

Polyphonic flex mode time stretches material based on a process called phase vocoding —a process which uses phase information to time stretch an audio signal without touching its pitch. It is the most processor-intensive of all the flex modes, but it delivers high sonic quality with suitable polyphonic material.

Getting to Know the Flex Modes

Logic Pro offers two methods of punch recording: Punch on the fly: Involves the use of a key command to start recording while in playback mode. Autopunch: Involves the use of predefined punch-in and punch-out points to start and stop recording. Note: Only record-enabled tracks are affected by punch recording. Audio Punch Recording on the Fly: A useful and common recording practice is to ...

Logic Pro supports all audio hardware that offers a Core Audio driver, and Digidesign TDM hardware that works with DAE under Mac OS X. You can also use your TDM audio interfaces by making use of Core Audio. This may be beneficial in certain cases, should you wish to open songs created in native audio engines.
