As the number of people with multiple health conditions grows, meeting their needs will be one of the biggest challenges facing the NHS. People with multiple conditions often have poorer quality of life and greater risk of premature death.

*Understanding the health care needs of people with ...*

Introduction. Receiving health care services can improve a person's physical, mental and social health, quality of life and life expectancy. Barriers to accessing health care, on the other hand, can lead to unmet health needs, a lack of preventive services, and preventable, costly hospitalizations. But in many parts of the country, especially in rural and other underserved areas, the supply of health care providers cannot keep up with the demand for services.

The first stage in getting any social care is for the local authority to assess your needs, called a needs assessment. This is so the local authority (local council) can gain a full picture of what kinds of care and support needs you have, so they can make informed decisions about whether you're eligible for support.
