value understanding is key, as students will be grouping the tens and then the ones. For example, to solve  $24+53$ , we will first add  $20+50$  to make 70, then  $4+3$  to make 7, and finally  $70+7$  to make 77.

### ~~Mental Math Addition Strategies for Math Fact Fluency ...~~

One strategy is to partition one of the numbers and use the distributive law of multiplication over addition. So, for example,  $6 \times 7 = 6 \times (5 + 2) = 6 \times 5 + 6 \times 2$  or, in words, ' seven sixes are five sixes plus two sixes ' . Subtraction can be used similarly, so ' nine eights are ten eights minus one eight ' .
