Following his seminal book Wood and Wood Joints, an essential reference on solid timber constructions for more than two decades, now in its third edition, Klaus Zwerger presents a study of the cultural history, construction and

typology of a special building type: cereal drying racks. These structures were used to dry harvested crops in agrarian cultures all over the world and evolved over the centuries into buildings of great beauty that are as sophisticated and individual as they are functionally efficient. On countless expeditions, the author tracked down the remaining buildings, documenting and analyzing them in the context of their cultural and building history through detailed descriptions, line drawings and photographs, rendered in duotone, by the author.

This is the first comprehensive book devoted exclusively to cancer in adolescents and young adults. It compiles medical, epidemiological, biological, psychological, and emotional issues of young adults' oncology. The emphasis is on the differences of the "same" cancer in younger and older patients. Model programs specially designed to care for patients in the age group and surveillance of long-term adverse effects are reviewed.

Looks at the history of flight, covering the technical characteristics, development, operating histories, and successes of various types of aircraft.

This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition.

This book presents a grounded meta-theory that describes, interprets, explains and predicts the process of accountability. Refreshingly accessible and relevant to the practitioner throughout it provides a holistic view of accountability.

Andreas Nikolaus "Niki" Lauda, born on 22nd February 1949, Vienna, Austria was a Formula One driver, a 3-time F1 World Drivers' Champion, winning in 1975, 1977 and 1984, and an aviation entrepreneur. Niki was the only driver in F1 history to have been champion for both Ferrari and McLaren, the sport's two most successful constructors, being widely regarded as one of the greatest F1 drivers of all time.

"If man were meant to fly, he'd have wings." Luckily, the intrepid pioneers of aviation didn't let that little detail stop them. Dedicated to the history of human flight, this richly illustrated retrospective spans centuries of innovation from the drawings of DaVinci to the daring deeds of John Glenn. Strap yourself in for a thrilling, sometimes bumpy ride as the uncertain attempts of the medieval period give way to the excitement of the Wright Brothers' advances and eventually the sophistication of the Space Shuttle. Whether warplanes, transport and tourism crafts, acrobatic machines, seaplanes or helicopters capture your imagination, you'll find every type of aircraft described in vivid detail. Marvel as technology leads to the development of convertiplanes, 21st century superfighters, and the controversial Concorde. You'll even glimpse the future of air travel with prototypes of commercial airliners yet to be produced by Airbus and Boeing.
