This volume provides a detailed legal analysis of the fourth pillar of the international maritime regulatory regime, the comprehensive Maritime Labour Convention, 2006, and its provisions to achieve decent work for seafarers and a level playing field for shipowners.

This is the second of a three-volume set which will bring together the law of the sea, shipping law, maritime environmental law, and maritime security law. This volume focuses on shipping law, providing a detailed assessment of this area of law by leading practitioners and eminent scholars.

This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume II: Shipping Law provides a detailed understanding of the historical development of shipping law looking at concepts, sources, and international organisations relating to shipping law; nationality, registration and ownership of ships; ship sale and shipping contracts; ship management and ship finance; arrest of ships; international trade and shipping documents; carriage of goods, passengers and their luggage by sea; maritime labour law; law of maritime safety; law of marine collisions; law of salvage; law of general average; law of towage; law of harbours and pilotage; limitation of liability for maritime claims; and law of marine insurance. Volume II published in October 2014 addresses the major issues which arise in the law of the sea. The forthcoming Volume III will provide analysis of marine environmental law and maritime security law. The full three-volume Manual will set out the entirety of international maritime law, re-stating and re-examining its fundamental principles, how it is enacted, and the issues that are shaping its future. It will be a superlative resource for those working with or studying this area of law.

This book provides a brief but thorough introduction to the formulation, adoption and application of internationally agreed standards of good practice in labour matters - international labour Conventions and Recommendations - and has been updated to cover developments up to mid-1997. The manual is intended for trade unionists, students and the general reader interested in labour matters, social issues and human rights. It is designed for use on workers' education courses as well as for individual study.

Sometimes called a "bill of rights" for seafarers, the Maritime Labour Convention, 2006 sets out rights to decent working conditions and helps to establish conditions for fair competition for ship owners. It was designed as a global legal instrument that will become the fourth pillar of the international regulatory regime for quality shipping, complementing the key conventions of the International Maritime Organization (IMO). The convention contains a comprehensive set of global standards, consolidating almost all the existing maritime labor conventions and recommendations that have been adopted since 1920 in a single new instrument with a new format and requirements that reflect modern conditions in the industry. This essential new reference source presents the full text of the Maritime Labour Convention, 2006, along with a collection of related standards, including the Seafarers' Identity Documents Convention (Revised), 2003 (No. 185); the Work in Fishing Convention, 2007 (No. 188) and its accompanying recommendation; as well as the ILO's fundamental conventions and the Declaration on Fundamental Principles and Rights at Work and its follow-up.

This volume provides a detailed legal analysis of the fourth pillar of the international maritime regulatory regime, the comprehensive Maritime Labour Convention, 2006, and its provisions to achieve decent work for seafarers and a level playing field for shipowners.

Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume I: The Law of the Sea addresses the major issues which arise in the law of the sea. It provides a detailed understanding of the historical development of the law of the sea; the role of the International Maritime Organization; the law surrounding maritime zones; the legal regime of islands; the international sea-bed area; the legal regime governing marine scientific research; the rights and obligations of land-locked and geographically disadvantaged states; the legal regime of Arctic and Antarctic; and the settlements of disputes. This volume also considers the ways in which human rights and the law of the sea interact. The forthcoming Volume II will address shipping law; Volume III will provide analysis of marine environmental law and maritime security law. The full three-volume Manual will set out the entirety of international maritime law, re-stating and re-examining its fundamental principles, how it is enacted, and the issues that are shaping its future. With the Maritime Labour Convention now in force (as of August 2013), the shipping industry is faced with a new international convention that has comprehensive implications across all sectors. This vital text provides timely analysis and thought-provoking essays regarding the Convention's application and enforcement in practice. Hailed as the "Seafarer's Bill of Rights" and the "fourth pillar" of the international regulatory regime for quality shipping, the Maritime Labour Convention is set to significantly alter the playing field for key stakeholders. This book offers diverse and interesting commentary in respect of the Convention's impact on core sectors of the shipping industry, identifying both strengths and weaknesses of the Convention, as well as potential hurdles that will need to be overcome. Each chapter focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore, the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. ---In memory of Richard Shaw---
