Sheard redefines the concept of "retirement" as an issue of financial independence that can be achieved at any age. He spells out clearly, as no book has before, exactly how to set up and reach personal financial and lifestyle goals through savvy investing. Designed for boomers now in their peak earning years, the book cuts through the complicated formulas and actuarial tables to show readers how to figure out exactly how to plan for and achieve financial independence. Eschewing the traditional approach to retirement at 65, the book acknowledges that boomers are in a hurry. They want to get on with their lives, change careers, take sabbaticals -- in short, to pursue their dreams. By abandoning the age criteria and formulating a new approach to retirement, Sheard makes this possible. Using the techniques he made famous while with the Motley Fools, Sheard develops a framework that treats individuals as self-sustaining "foundations," living off a well-invested

Life is not lived all at once—it ' s lived in moments, days, months, years, and decades. This means that the financial plans and actions we all have to take to meet our responsibilities sensibly must be organized by years and decades. Ben Stein wrote the original guide to this subject almost a quarter century ago. Now, Ben, along with Phil DeMuth, the eminent financial planner and writer, have gotten together to update the book, incorporating the massive changes that have occurred in the economy in the past 25 years. This book tells you what and when to save, how much to save, what to save it in, when to spend, and when to say no to your present and yes to your future. Yes, You Can Get A Financial Life! is a time-traveling guidebook on how to organize the money side of your life for all of the decades of your life.

Doing well with money isn ' t necessarily about what you know. It ' s about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don ' t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make
