New Technologies, Innovations. Advances in technologies used for well drilling and completion have enabled the energy industry to reach new sources of oil and natural gas to meet rising demand around the world. New technologies have also helped reduce the environmental impact of energy production by allowing more oil and gas to be produced with fewer wells.

[New Technologies, Innovations - Oil&Gas Portal](#)

When you burn oil or gas, they heat the surroundings. Energy is transferred from the chemicals to the surroundings. The original source of this energy is the Sun. Plants use the Sun's energy to produce sugars and oxygen from carbon dioxide and water, during photosynthesis. This energy is stored in the chemicals the plant produces.
