This book is a printed edition of the Special Issue "Sustainable Business Models" that was published in Sustainability

This book is developed by focusing on the four issues: (1) product strategy of private brand; (2) pricing strategy of private brand; (3) channel strategy with private brand introduction; and (4) supply chain coordination with private brand introduction. Private brand (PB), also known as private label (PL) or store brand (SB), refers to a brand created and controlled by a retailer. In the 1960s and 1970s, private labels began to emerge in France and England. Although private label has grown rapidly worldwide, market share varies greatly from region to region. According to Nielsen's 2018 Global Private Label Report, the largest markets for private-label products

are found primarily in the more mature European retail markets. In recent years, many large domestic retail enterprises have launched their own brand products. With the growth of e-commerce, some online retailers have also launched private-label goods. JD started to introduce its private brands in 2010, with annual sales of its private brand products reaching several hundred million yuan. However, at present, the market share of China's private label is only 1-3%, which still has a big gap compared with Europe and America. The main challenges to China's private label lie in private brand operations management. Among them, how to select the correct product categories, how to make pricing decision, how to restructure channels and how to coordinate supply chain after introducing private brands are four operations management problems need to be solved.

However tourism has grown so rapidly that many issues associated with the incorporation of cultural and heritage experiences in tourist itineraries (such as authenticity verses commodification, exploitation of national cultures, impacts on local communities, and the management of heritage resources) have not been adequately addressed and must be debated. This revealing book reviews recent developments in cultural and heritage tourism in the Asia Pacific region and provides a discussion on how communities have faced and overcome significant challenges to develop and market their culture and heritage resources. A range of models and case studies are used to deepen the reader's understanding of heritage and cultural issues, to illustrate many of the more controversial issues, and to examine new evaluative, and planning tools. This book is a special issue of the Asia Pacific Journal of Tourism Research.

Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union. However, a growing demand for policy advice, technical assistance and expertise is also coming from Asian reforming countries such as China, Mongolia, Vietnam, Laos and Cambodia. In addition, business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries. Such developments are too important to overlook or ignore. The transformation of socialist economies towards market-based systems entails an unusually wide range of problems. Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents. Although the structural features of Asian reforming economies are

in important ways different from those of the Eastern European economies, all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues. This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia. The contributions are by no means exhaustive. However, they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies.
