This manual provides an organized reference to aid in management of clinical problems and preparation for board exams. A standardized outline format is used in order to emphasize relevant information and allow rapid retrieval of key points. Each section starts with anatomy and physiology—the essential framework for understanding the basis for the related diseases—and then summarizes specific disease entities in outline format, with major features highlighted. For quick reference over 200 specific disease entities are listed, along with corresponding page numbers, on the inside front cover of the book. Figures have been selected to demonstrate classic findings and to highlight important relationships. The manual covers all material listed in the OKAP Subject Outline published by the AAO.

The updated Third Edition of this manual is a comprehensive self-assessment review of ophthalmology and a valuable study aid for any ophthalmologist or ophthalmologist-in-training. It contains over 3,000 true/false, matching, and multiple-choice questions covering the entire field of ophthalmology, including the subspecialties. Answers are provided along with brief explanations and extensive references. Several hundred new questions have been added to this new edition, with significantly updated content and revised, expanded explanations. Two new chapters cover General Medicine and International Ophthalmology. This edition also includes more than 100 full-color photographs depicting ocular pathology and ophthalmic conditions.

The new Fourth Edition of the Massachusetts Eye and Ear Infirmary Review Manual for Ophthalmology provides a comprehensive self-assessment review and serves as a valuable study aid for any ophthalmologist or ophthalmologist-in-training. The text contains over 1,500 multiple-choice questions covering the entire field of ophthalmology, including all of its major subspecialties. Answers with explanations are provided for each question, and references are included at the end of each chapter. This edition includes more than 250 new full-color photographs and drawings depicting ocular pathology and ophthalmic conditions. All chapters have been updated with new questions to reflect the latest teaching in the field. A companion website features an interactive test bank with images. The test bank includes all 1,540 questions from the book plus over 300 unique questions for additional self-assessment practice.

Preceded by Neuro-ophthalmology / Lanning B. Kline, Rod Foroozan, Frank J. Bajandas. 7th ed. c2013.

With high quality color images combined with up-to-date treatment guidelines and a proven template, the third edition of The Massachusetts Eye and Ear Infirmary Illustrated Manual of Ophthalmology is a vital companion for every ophthalmic trainee, primary care practitioner and emergency trauma unit. The bonus PDA software allows you to access the entire contents of the manual on the go. Provides thorough, easily accessible and up-to-date information for all common eye disorders, creating an all-in-one resource for quick diagnosis and treatment. Uses highlighted emergency management boxes for a clear presentation of the crucial treatment of critical situations. Follows a templated format with key boxes highlighting important information. Presents full-color photographs throughout so you can compare real case presentations for more accurate diagnosis. Orders chapters anatomically (not by ophthalmic subspecialty) making it easier to locate the desired information by looking at the effected area. Provides a complete and thorough update with expanded sections, including age related macular degeneration, diabetic retinopathy, uveitis, glaucoma, dry eye, and refractive surgeries. Incorporates over 100 new high quality clinical color photos plus spectral domain OCT, CT scan, fluorescein angiogram, visual field, and corneal topography images. Adds brand new appendices outlining basic eye care and differential diagnosis information to help minimize wasted time in the clinic. Offers immediate and convenient access to the whole manual when on the go with bonus PDA software.

Almost 30 years since it was first published, Neuro-Ophthalmology Review Manual by Drs. Lanning B. Kline and Frank J. Bajandas is now available in an updated Sixth Edition. With new information and effective exercises, this easy-to-read reference addresses the clinical neuro-ophthalmology principles used in everyday practice. Neuro-Ophthalmology Review Manual, Sixth Edition's use of illustrations, anatomy diagrams, and tables allow for a user-friendly format and quick access to valuable information. This sixth edition includes 28 tables; 138 figures, including 33 hypothetical cases to test the reader in diagnosing visual field problems; and updated and expanded references for all chapters. New to this Sixth Edition: • Revised chapter on supranuclear and internuclear gaze pathways • Revised chapter on headache • Updated and expanded chapter on visual fields • Updated and expanded chapter on nystagmus and related ocular oscillations Topics addressed inside include: • Ocular motor cranial nerve syndromes • Cavernous sinus syndrome • The pupil • Optic nerve disorders • Eyelid abnormalities • Carotid artery disease • Non-organic visual disorders • Phakomatoses • Ancillary clinical procedures Neuro-Ophthalmology Review Manual, Sixth Edition is a succinct text for all practitioners and residents in ophthalmology, neurology, and neurosurgery. A popular choice among colleagues for almost 30 years, this text is a must-have resource in neuro-ophthalmology.

"The Certified Ophthalmic Assistant Exam Review Manual, Third Edition is a revised edition of the best-selling exam preparation manual. It is an essential resource for anyone preparing to become certified as an ophthalmic assistant. With over 1300 exam-style questions and explanatory answers, illustrations, and photographs, this user-friendly text is excellent for both learning and reviewing important eye care topics. Subjects include taking a patient history, lensometry, measuring intraocular pressure, understanding optics, and much more. This edition is also helpful for students and others studying for certification in optometry, contact lenses, and opticianry"--Provided by publisher.

Updated for its Second Edition, this question-and-answer review book offers a concise review of ophthalmology. It combines a review of basic ophthalmology with real-life clinical cases and multiple-choice questions with answers and explanations. More than 400 clinical photographs, fluorescein angiograms, and CT, MRI, and ultrasound images help readers master this visually oriented specialty. This edition has over 100 new full-color illustrations. Focusing on common diseases, the book covers all specialty rotations, plus key areas such as embryology, anatomy, pediatrics, plastics, and lenses. This edition includes new cases and information on new drugs, especially glaucoma drugs.

Don't take chances with your exam prep! Trust Review of Ophthalmology to help you study all the current information you need to know to ace your exams! Efficiently review a wide spectrum of topics with an organization by common ophthalmologic subspecialties. Maximize retention with a popular outline approach that distills key information on each topic alongside sample review questions. Review the findings of many important clinical studies with which you are expected to be familiar. Test your understanding of essential information with questions at the end of each chapter and answers at the end of the book. Study on the go, search the complete text online, and download images at www.expertconsult.com. Be fully prepared for current exam topics with information on the latest techniques in corneal surgery, macular degeneration treatment and trials, and expanded treatment options for many sections. View anatomic details, common ophthalmic test findings, and examples of classic histopathology specimens through brand-new illustrations and photographs. Ace your exams with Trattler, Friedman and Kaiser's Review of Ophthalmology!
