be useful to read the definition of Odds and payoffs in Pitman pp. 6 in order to solve this exercise Question

a) We define the profit  $pr$  as  $pr = 10(8 + 1) - 100 = 10$

Question b) The average gain per game is defined as the profit divided by the number of games  $pr/n = 10/100 = 0:1$
