To get started we first need to load a operating system onto our SD card. The Raspberry Pi runs a linux based operating system called Raspbian. The Raspbian operating system has a window based UI much like windows and is easy to setup and use. In order to install Raspbian we need to first download it from the Raspberry Pi website here. Make sure you download the version with the desktop.

I have not done any programming since BASIC and Pascal in high school -- like a million years ago. I am somewhat intimidated by learning a new programming language. I do not even know what languages those miniature computers use. I know that I can buy starter kits for Pi Zero and the like from places like Adafruit, but that is as much as I know.
