Essays explaining the psychological processes leading to the development of racial and ethnic identity

In contrast to other disciplines, social psychology has been slow in responding to the questions posed by the issue of ethnicity. The Social Psychology of Ethnic Identity demonstrates the important contribution that psychology can make. The central aim of this book is to show, on the one hand, that social psychology can be used to develop a better understanding of ethnicity and, on the other hand, that increased attention to ethnicity can benefit social psychology, filling in theoretical and empirical gaps. Based on recent research, The Social Psychology of Ethnic Identity brings an original approach to subjects such as: * ethnic minority identity: place, space and time * hyphenated identities and hybridity * self-descriptions and the ethnic self. The combination of diverse approaches to this burgeoning field will be of interest to social psychologists as well as those interested in issues of identity, ethnicity and migration.

This book demonstrates and explicates the work of scholars and practitioners who are exploring the interconnectedness of racial and ethnic identity scholarship to human development in order to promote successful pedagogical practices and services. Racial and ethnic identity issues are brought directly to schooling so that teaching-learning experiences, psychological services, and counseling practices within the educational process can be made more effective for a greater number of students. By acknowledging that the racial and ethnic psychological experiences of individuals are consequential, the volume: * Provides scholars and students in psychology, educational psychology, counseling, and teacher preparation programs with current research on racial and ethnic identity formation and human development. * Explains why traditional theories of human development, which lack racial and ethnic dimensions and which have evolved exclusively from a Eurocentric perspective, are problematic. * Documents current best practices from psychology, educational leadership, counseling, and teaching and classroom practices that support the claim that practitioners who are aware of racial and ethnic identity (their own and others) are better prepared to respond to students from their own background as well as those from other racial, ethnic, and cultural backgrounds. Part I explains why the relationship among racial identity, ethnic identity, and human development is critical to schooling and provides the conceptual framework guiding and unifying subsequent chapters. In Part II, current research in racial and ethnic identity is presented and discussed. Challenges and strategies for multicultural practices are the focus of Part III. This book's goal is to help researchers, practitioners, and graduate students whose work directly intersects educational issues and the needs of children within the school environment to interpret and contextualize relevant research and theory, and to bridge theory into practice.

In this book, social and applied scientists from a wide range of fields investigate the process by which ethnic identity is formed and maintained throughout the lifespan.

A guide to the latest research on how young people can develop positive ethnic-racial identities and strong interracial relations Today ' s young people are growing up in an increasingly ethnically and racially diverse society. How do we help them navigate this world productively, given some of the seemingly intractable conflicts we constantly hear about? In *Below the Surface*, Deborah Rivas-Drake and Adriana Umaña-Taylor explore the latest research in ethnic and racial identity and interracial relations among diverse youth in the United States. Drawing from multiple disciplines, including developmental psychology, social psychology, education, and sociology, the authors demonstrate that young people can have a strong ethnic-racial identity and still view other groups positively, and that in fact, possessing a solid ethnic-racial identity makes it possible to have a more genuine understanding of other groups. During adolescence, teens reexamine, redefine, and consolidate their ethnic-racial identities in the context of family, schools, peers, communities, and the media. The authors explore each of these areas and the ways that ideas of ethnicity and race are implicitly and explicitly taught. They provide convincing evidence that all young people—ethnic majority and minority alike—benefit from engaging in meaningful dialogues about race and ethnicity with caring adults in their lives, which help them build a better perspective about their identity and a foundation for engaging in positive relationships with those who are different from them. Timely and accessible, *Below the Surface* is an ideal resource for parents, teachers, educators, school administrators, clergy, and all who want to help young people navigate their growth and development successfully.

questions posed by the issue of ethnicity. The Social Psychology of Ethnic Identity, Second Edition, demonstrates the important and diverse contribution that social psychology can make. Comprehensively updated to include the latest research on dual and multiple identities, mutual links between sense of ethnic identity and social contexts, and the development of ethnic identity in adolescence, this new edition now also features research from non-European cultural contexts, including Turkey, Mauritius and Myanmar. The book shows, on the one hand, that social psychology can be used to develop a better understanding of ethnicity and, on the other hand, that increased attention to ethnicity can benefit social psychology. By filling in theoretical and empirical gaps, Maykel Verkuyten brings an original approach to subjects such as: ethnic minority identity – place, space and time; hyphenated identities and duality; and self-descriptions and the ethnic self. Featuring the latest theoretical ideas and research, the combination of diverse approaches to this burgeoning field make this book invaluable reading for students of psychology and related disciplines, as well as researchers and professionals.

The classic, bestselling book on the psychology of racism -- now fully revised and updated Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.

Multicultural aspects of psychology have received some attention in the literature in the last decade. A number of texts currently address these significant concerns, for example, Counseling the Culturally Different (Sue & Sue, 2008); Handbook of Multicultural Counseling (Potterotto et al., 2009); and Handbook of Multicultural Counseling Competencies (Pope-Davis & Coleman, 2005). In their most recent editions, several of these books address more nuanced complexities of diversity, for example, the intersections of gender or social class with race-ethnicity. Meanwhile, other texts have addressed gender issues in psychology (Handbook of Counseling Women, Counseling Men), with some attention paid to racial-ethnic and other diversity concerns. Clearly the progression of scholarship in this field reflects the importance of incorporating multiple aspects of diversity within psychology. However, no book currently exists that fully addresses the complexities of race-ethnicity and gender together. Better understanding of the dual impact of race-ethnicity and gender on psychological functioning may lead to more effective conceptualizations of a number of mental health issues, such as domestic violence, addictions, health-related behaviors and achievement. Exploring the impact of race-ethnicity and gender also may provide a broader understanding of self-in-community, as this affects individuals, families and other social groups and work and career development. Topics of interest may include identity development, worldviews and belief systems, parenting styles, interventions for promoting resilience and persistence and strategies for enhancing more accurate diagnostic and treatment modalities. Today's world is comprised of multiple and intersecting communities that remain in need of psychological models and interventions that support and promote both individual and collective mental health. We believe that utilizing unidimensional conceptual models (e.g. focusing solely on race-ethnicity or gender) no longer adequately addresses psychological concerns that are dynamic, complex and multi-faceted. The proposed Handbook will focus on timely topics which historically have been under-addressed for a number of diverse populations.

What hopes are there for racial integration? What expectations may we reasonably have of ethnic minority groups? What hopes can ethnic minority groups nurture in their relations with society at large? In addressing these and many other questions, the author examines the theoretical perspectives, both sociological and psychological, of ethnic minority identity and reviews the empirical work done on ethnicity. She considers what constitutes an ethnic group, goes on to investigate the sociology of ethnicity from assimilationism to cultural pluralism, and discusses the psychological theories of ethnic minority identity. She then examines research issues in ethnicity, covering areas such as styles of cultural adaptation, strategies of self-categorization, and levels of self-esteem among members of ethnic minority groups. In conclusion, she examines the implications of these findings in relation to the integration of ethnic minority groups in Britain.
