Planners have tended to blame the problems of so-called ' strategic planning ' on a set of ' pitfalls ' —notably the lack of top management support and organizational climates not congenial to planning. But planning may well have discouraged the very support its proponents claim to need, and its itself may have generated climates uncongenial to effective strategy making.

By Doug Williamson on August 19, 2018 Comments Off on Rethinking Strategic Planning. It is time for a major shift in the way leaders and their organizations go about the process of creating their business strategy. How business leaders evaluate the landscape, make sense of the environment, proactively shape the opportunities they see and then decide on which course of action to take — in other words, Strategic Planning — deserves far closer attention than it has received so far.

H. Igor Ansoff was the prominent reference in the corporate strategy field, especially during the 1960s and 1970s. His bestseller, *Corporate Strategy*, was the first to give a conceptual framework and a tool box to top managers, consultants and scholars. Recognized as the real pioneer of the field, he was seen by Henry Mintzberg as also the leader of the strategic planning school.

Creative Industry practices are increasingly manifested through hybrid models and methods and emerging sub-sectors. With ever finer dividing lines between form and content, product and service, participation and consumption, the distinctions between sectors are increasingly blurred, while new, convergent models emerge. Reflecting this fluid context, this book provides a new perspective on strategy in the Creative Industries. Based on extensive original research and live empirical data derived from case studies, interviews, and observations with creative managers, it reveals strategic decision-making by analysing business manoeuvres and stages of innovation in the Creative Industries. Through analysing the interactive features of aesthetically driven information assets, and how new user/consumer cultures are applied, it uncovers the principles that are transforming strategy in the Creative Industries. This innovative volume will be of significant interest to scholars, advanced students and practitioners in the Creative Industries as well as well as industry consultancies and practitioners.

This book offers innovative ideas and frameworks for sustainable strategizing to advance business by scaling-up its positive impact, which is so urgently needed at this time in the 21st century. It shows practitioners how to effectively deal with socio-ecological systems' disruptions to their operating environments and play an active role in transforming markets toward a sustainable future. In short, the book demonstrates how to make business sense of sustainability, highlighting new approaches and examples that translate sustainability into strategy and action. The ultimate goal is to provide a path toward a thriving future for both business and society. This book was written for strategy practitioners and decision makers who want to understand why sustainable strategizing is important in today's business world and are seeking actionable business knowledge they can apply in their companies. It was also written for students of management and can be used as a supplemental text to support traditional graduate and undergraduate management courses.

Higher Education Strategy and Planning draws together a team of expert contributors from across the sector to offer contemporary descriptions of practice in Higher Education and critical reflections on that practice. Many of the tools and techniques transcend the particular national system within which they are situated and therefore have global relevance for all those interested in strategy and planning in Higher Education. Containing chapters on each of the major functions or capabilities of strategic planners, critiques of global policy trends, framework examples and explanations of the main league tables both in the UK and globally, the book is divided into five main parts: - Context and Positioning; - Integrated Planning; - Centrality, Coordination and Connection; - Analytical Capacity and Capability; - Insight and Information. This text offers a contemporary representation of strategic planning and will be an indispensable guide for all those who work in or study Higher Education, particularly aimed at those who work in strategy, planning and leadership roles.

Edited by one of the best-known and most widely respected figures in the field, "Planning for Information Systems" is a comprehensive, single source overview of the myriad ideas and processes that are identified with IS planning. While many chapters deal with high level strategic planning, the book gives equal attention to on-the-ground planning issues. Part I, 'Key Concepts of IS Planning', focuses on how IS planning has evolved over the years; business-IS strategic alignment; and the role of dynamic organizational capabilities in leveraging IS competencies. Part II, 'The Organizational IS Planning Process,' describes IS planning in terms of critical success factors and includes a knowledge-based view of IS planning; a practical assessment of strategic alignment; the IT budgeting process; the search for an optimal level of IS strategic planning; and the role of organizational learning in IS planning. Part III, 'IS Investment Planning', deals with predicting the value that an IS project may have; a 'rational expectations' approach to assessing project payoffs; assessing the social costs and benefits of projects; an options-based approach to managing project risks; planning for project teams; and the moderating effects of coordinated planning. Part IV, 'Goals and Outcomes of IS Planning', considers information strategy as a goal and/or outcome of IS planning; IT infrastructure as a goal or outcome; competitive advantage as a goal or outcome; e-process partnership chains; and planning successful Internet-based projects.

First published in 1998, this volume emerged as part of the series Plymouth Studies in Contemporary Shipping, which represents a unique collection of papers and texts edited from the leading maritime institute in Western Europe at the University of Plymouth. Covering research from a range of geographical sectors but with a particular emphasis on Western Europe, developing countries and Eastern Europe the topics covered emerge from the full range of business areas including maritime economics, policy, statistics, logistics, law and business studies. Designed for both the practising academics and the shipping and ports industry itself, this series is an original and novel contribution to the maritime debate. This particular volume focuses on ports in Poland and Eastern Europe more widely as transition economies after the fall of the Soviet Union. Susanne Ferch and Michael Roe examine their use of strategic management systems to determine whether and how the highly turbulent environment is reflected in the systems at Poland's largest ports, Gdynia and

Strategy is something with which managers regularly engage throughout their working lives, yet it is often written and researched as though periodic box-ticking exercises are the only show in town. This textbook provides students and professionals with a solid understanding of the strategic management theories, along with the tools needed to apply them and contribute toward successful organizations. The author starts from how strategy is realized in the business world and applies the key theories to provide a rounded understanding. Contemporary cases studies are provided to help readers visualize the application of strategic thinking. Including the various stakeholders, organizational politics and culture, the author opens a window to the real world of strategic management. Primarily aimed at postgraduate students and those in executive education, this textbook will also be useful as a handbook for managers looking to get their heads around this easily confused subject.
