Every plane of the cube can be rotated either clockwise or counterclockwise in relation to the rest of the cube. As you hold the cube in front of you, these planes are identified as front (F), top (T), right (R), left (L), back (B), and down (D). Each letter indicates a 90 degrees clockwise rotation of the corresponding plane.

IDA* is one of the best algorithms for solving the Rubik's cube because the state space is large and there aren't very many duplicates if you do proper move pruning. To get an efficient solver you need move pruning and good heuristics. Typically there are three moves per face - 90 degrees forward/backwards and 180 degrees.

In my opinion, this is the best cube you can get today. It has the popular dual adjustment system that MoYu introduced a while ago but the overall design of this cube makes it a fantastic puzzle that will be sitting among the top cubes for a long time. The cube is unbelievably fast. Probably one of the fastest cubes I ever had a chance to try.

Solving the yellow edges on the top. We solve the yellow edges on the top of the Rubik's Cube in two steps: First we orient them to form a yellow cross on the top , then we swap the pieces to match them with the side colors . 4. The Top Cross. In the fourth step we want to form a yellow cross on the top of the cube.

How To Solve The Yellow Top Edges On The Rubik's Cube

In this fourth stage of our Rubik's tutorial we want to form a yellow cross on the top of the cube. At this point it doesn't matter if the edge pieces don't match the color of the side center pieces. We will switch them in the fifth step. There's a short algorithm we have to use: F R U R' U' F'.

How to make a yellow cross on the top of the Rubik's Cube?

In the fourth lesson on the Rubik's Cube (the penultimate solving lesson), progress is made on the top layer, continuing on from the previous lessons in which the first two layers were solved. This stage will solve the entirety of the cube except the last four corners. The top layer has many different solving methods, but the one chosen is similar to the first stage, the cross, so it will help students understand what they are doing better.
