A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

prior to 1990.

The natural interest rate is of great relevance to central banks, but it is difficult to measure. We show that in a standard microfounded monetary model, the natural interest rate co-moves with a transformation of the money demand that can be computed from actual data. The co-movement is of a considerable magnitude and independent of monetary policy. An optimizing central bank that does not observe the natural interest rate can take advantage of this co-movement by incorporating the transformed money demand, in addition to the observed output gap and inflation, into a simple but optimal interest rate rule. Combining the transformed money demand and the observed output gap provides the best information about the natural interest rate.

Perfect for public librarians, instructional librarians, technology and digital resource specialists, and library training specialists, this book is an essential resource for digital literacy instruction. • Frames instruction of Internet basics in an economical and highly relevant manner for public librarians and their users • Provides complete training scripts with step-by-step instructions and sample screen shots • Suggests hands-on activities that apply skills taught

and provide opportunity for independent practice • Contains an annotated appendix of free online courseware that supplements and enhances Internet basics instruction

This report was presented at a World Tourism Organization seminar, held in Egypt in September 2002, to discuss prospects and trends in tourism to Middle East and North African (MENA) countries. Issues examined include: attitudes towards travel, leisure and holidays; typical activities undertaken and holiday satisfaction levels; perceived barriers to visiting the region; health, safety and security issues. It looks at a range of visitor profiles, both in terms of the identified characteristics of current and potential visitors to the MENA region, and by individual country.

The issue of healing within the Church is a controversial and divisive one. In *The Healing Stream*, a former Anglican bishop seeks to provide a practical theology of healing for those from a Catholic tradition. '
