NOW AT YOUR FINGERTIPS: Every performance test for completing a home energy audit. If you're a professional in today's fast-evolving industry of high performance construction and retrofits, then you've probably found yourself wondering a few things: Who can show me how to run that test? How do I get the most out of the equipment I own? Why do the tests work, and how do I explain them? What quality control methods should I use? Which tools will make my job faster and easier? With this guide, experienced and new diagnosticians alike will get step-by-step details on advanced testing, complete with best practices, important concepts and pitfalls, ways to present data to the client, Step-By-Step photographs, and time-saving tips, plus quiz questions for each diagnostic!

Provides a guide for the inexperienced homeowner on how to improve the energy consumption of a home, and includes tips on budget planning, air ventilation, energy-saving HVAC systems, and building codes and permits.

This book presents an energetic approach to the performance analysis of internal combustion engines, seen as attractive applications of the principles of thermodynamics, fluid mechanics and energy transfer. Paying particular attention to the presentation of theory and practice in a balanced ratio, the book is an important aid both for students and for technicians, who want to widen their knowledge of basic principles required for design and development of internal combustion engines. New engine technologies are covered, together with recent developments in terms of: intake and exhaust flow optimization, design and development of supercharging systems, fuel metering and spray characteristic control, fluid turbulence motions, traditional and advanced combustion process analysis, formation and control of pollutant emissions and noise, heat transfer and cooling, fossil and renewable fuels, mono- and multi-dimensional models of thermo-fluid-dynamic processes.

Structured on practical criteria, The Handbook of Thermoprocessing Technologies provides a detailed overview of the entire thermoprocessing sector and is of particular use to students of all relevant disciplines, to manufacturers, users and to engineers in this field. The first volume examines the basic principles, procedures and processes involved in thermoprocessing technology. In Europe thermoprocessing is the third largest energy consumption sector with a very diversified and complex structure. Accordingly we find the application know-how for the design and the execution of respective equipment represented by a multitude of small but very specialized companies and their experts. The second edition is based on the contribution of many highly experienced engineers working in this field. The book's main intention is the presentation of practical thermal processing for the improvement of materials and parts in industrial application. Additionally it offers a summary of respective thermal and material science fundamentals. Further it covers the basic fuel-related and electrical engineering knowledge and design aspects, components and safety requirements for the necessary heating

Through this collection of poems I am attempting to tell a story of life. This story is about my deep seated faith, and the reverence I have for God and his marvelous creation. In this book I am trying to underscore the virtues of redemption, hope, love, growth, truth and friendship. In my genuine effort to capture the humanity of my story, I felt compelled to address the fallibility of man so, sensitive issues like rejection, helplessness, brokenness, lying, hate and injustice had to be highlighted. This book seeks to remind us that, even with all the negativity, and the challenges of humanity, we can still see and feel the emblematic touch of God all around us. There are victories in the waiting so, we cannot lose hope. Hope safeguards one's life against despair and centers it on the endless possibilities of God. My life is a story well worth the living, because I have been blessed beyond measure. I was born in Jamaica, but I have spent the greater part of my living in southern Florida. I have been married to the same wonderful woman for thirty three years. Our lives have been sweetly enriched by our two lovely daughters and one exceptionally adorable grand daughter. I really enjoy putting my thoughts on paper, either in poems or songs. I am so inspired by the natural beauty I see all around me. I also carry a heavy burden for those who are victims of hate and injustice, advocating on their behalf will probably be the endeavor that guides my writing career.
